

Command Access Technologies

EZ-REX Switches

Features:

Field Installable Request-to-Exit or AE switch (for Schlage L9000 and Command Access ML1 series mortise locks) - sends a signal to alert the control panel that the door is about to be opened by someone intending to exit from within the secured area

Command Access Concealed Door Loop (CDL)

Features:

for 3/4" offset Pivots

- Offset Pivot Applications (3/4" only)
- Easy Installation
- Supports up to 105 degree swing
- 3-Year Warranty

This patented Concealed Door Loop (CDL) is a low cost method of transferring low voltage power from the door frame to the locking device. Whereas typical door loops are surface mounted and remain constantly visible, the CDL slides into the frame completely concealing itself when the door is closed. Commonly used in storefront or main entrance applications with 3/4" offset pivots that swing up to 105°. The CDL's aesthetic appeal will benefit retrofits and new installations alike.
