BEAUTY

THE GREEN GOLD STANDARD

When ELLE kicked off our annual eco-beauty awards 10 years ago, we wanted to recognize the handful of companies that were committed to using all-natural ingredients and making the world a better place. Fast-forward a decade, and the earth-friendly offerings are harder working, more sophisticated, and more varied than ever. Here, a panel of experts votes on the very best green beauty products for your face, body, hair—and overall health.

SKIN

With these complexion perfectors, green and gorgeous go hand in hand

CLEAN MACHINE
Ideal for dehydrated, sensitive, or rosacea-prone skin," says dermatologist Annie Chiu, MD. Gwyneth Paltrow's GOOP Luminous Melting Cleanser is infused with redness-reducing lavender as well as sunflower seed oil, which "helps repair the skin barrier."

DREAM CREAM
Chamomile- and calendula-powered WELEDA Skin Food "does it all," according to Dreadon. For an on-the-go minifacial, she spritzes an Avène Thermal Spring Water and then liberally applies the moisturizer "to leave skin luminous."

CLEAR VICTORY
The exfoliator that leaves Bandier's skin "cleaner and smoother" than any other? Alpha and beta hydroxy JUICE BEAUTY Green Apple Peel Full Strength, which contains brightening citrus and willow bark-derived salicylic acid.

SAVING FACE
ODACITÉ Ac+R Youthful Glow facial serum "delivers the potent antioxidant effects of acai berries, boosted by calming rose oil," says Chiu, who recommends applying a few drops to damp skin (to maximize absorption) before bed.

HOT CHOCOLATE
Beach essential EIR Surf Mud + Zinc, which combines SPF 30 with anti-inflammatory cocoa and glides on like a clear balm, was "inspired by ancient Mayan chocolate masks," says Gohara. Bonus: It can also be used to protect the scalp and hair.

MORNING GLORY
Not only does zinc-based DRUNK ELEPHANT Umbra Sheer Physical Defense SPF 30 guard against UVA and UVB, it's "packed with antioxidants like carotenoids that defend against oxidative damage, which can cause premature aging," Chiu says.

BODY-CONSCIOUS
Bacon hydrates head to toe with MONK OIL, "crafted only of the new and full moons." This blend of avocado, apricot kernel, cedar, lavender, and rose otto oils is enhanced with flower essences (yarrow, arnica, echinacea) and rose quartz crystal.

Chiu recommends a once-a-week gentle alpha-hydroxy facial peel to "reveal brighter skin, unclog pores, and lift discoloration."
