

**OK, SO NOW WE KNOW YOU'RE A REBEL. NICE... HERE'S THE INFO & PERKS:**  
( don't forget to scroll down to get your reward )

## HOW TO USE OUR LASER / INKJET TEMPLATES:

Since each printer is different, here are some tips to increase your odds of a perfect print:

**DOWNLOAD THE TEMPLATE:** Each shape & size has its own template. Find the full list of our sizes and shapes, along with their templates at [chromalabel.com/templates](http://chromalabel.com/templates)

**TRY IT OUT FIRST WITH THE TEST SHEETS:** The included test sheets will match the measurements of the labels – try those first so you don't use up your labels when you're getting the template dialed in.

**CHECK OUT THE FAQ VIDS:** Our 3-minute video will run through the most common questions, like margin adjustments, inserting images, and printing background colors. [chromalabel.com/templates](http://chromalabel.com/templates)

### ADDITIONAL TIPS:

**ACTUAL SIZE:** Make sure you're printing at 100%. (see Fig.1)

**SNUG SHEETS:** Make sure they're placed in your printer snugly.

**PLAIN SHEET:** Make sure you don't have comments enabled. This will change the print area. (see Fig. 2)

**EDIT TEMPLATE CAREFULLY:** You may need to adjust margins on the template by adjusting the top and left corner up or down – but be careful! Any small change can affect all the labels on the sheet.

## LABEL SHEETS GETTING STUCK?

Laser printable label sheets are thicker than your standard copy paper. You may need to change preferences in your printer to something like "card stock".

If all else fails, feel free to send us an email ([info@chromalabel.com](mailto:info@chromalabel.com)) or hop on our chat at [ChromaLabel.com](http://ChromaLabel.com) during business hours. We want to make sure you're satisfied with the product. Or if you're stumped and only used a couple sheets, in most cases we'll be able to extend a return to you.

**Keep in mind - this is a DIY product. You may need to test it, and results can vary.**

If you'd like a custom label instead, let us know, and we can get you a quote!

## ORIGINS & our values

Del was selling medical supplies in the 70's. Things were going fine until one Friday, when he decided to kick off work a little early to garden at home. The boss drove by, wrote him up, and Del got frustrated about the work/life balance.

He also knew there was a growing need for adhesive tapes and labels in medicine. His desire to be able to work from home (way ahead of his time, that guy) and his entrepreneurial spirit led him to his garage. One used tape printer later, he was in business. And we still have that same printer!

Fast forward nearly 5 decades: Del's son Andrew, and his childhood friend Joe, now oversee almost 50 employees. We now proudly serve manufacturing, aerospace, data, and (of course) medical industries, along with scores of others.

Today, that same expertise and passion drives us to provide you with custom solutions you need to stress out less, and save time at work...

*...so you can take a Friday afternoon off with your family.*

Del would approve.
