SAFETY FIRST

CAUTION
The oven gets very hot when in use. Take great care when removing tobacco/plant material from the oven. Turn the setting dial to OFF and allow to cool for 5 minutes before opening the oven door.

SAFETY INSTRUCTIONS
Read and follow these instructions carefully. Failure to follow these instructions could result in injury or damage.

- Keep out of the reach of children.
- Do not attempt to dismantle, reassemble or repair.
- The Alfa is not user serviceable apart from the removable mouthpiece and screen.
- Do not puncture, incinerate, drop or microwave your Alfa vaporizer.
- The Alfa is not a medical device.
- The manufacturer is not responsible for damage or personal injury caused by inappropriate, incorrect or irresponsible use.
- Do not use a non-Goboof charger.
- Do not use a damaged charger.
- Dispose of in accordance with local regulations for lithium-ion batteries.

WARRANTY
The Alfa vaporizer comes with a 2 year limited warranty from date of purchase. Goboof Products Ltd. warrants against defects in workmanship and materials, which occur during normal working of the Alfa vaporizer. The limited warranty does not apply to normal degradation of the batteries or if safety and cleaning instructions are not adhered to.

SETTING DIAL
LED LIGHT
MOUTHPIECE
CHARGING PORT
#1 CHARGE BATTERY

The Alfa uses a lithium-ion battery, which comes partially charged. To charge, plug the provided power adapter into a wall outlet and connect the charger lead to the vaporizer. No damage will occur to the vaporizer or battery if used prior to a full charge.

#2 LOAD OVEN

Open oven door, insert your screen and ground tobacco and then close the oven door.

TIP: Use grain tobacco for best results.

CAUTION: The oven gets very hot when in use.

#3 POWER ON

Rotate the setting dial to your preferred vaporizing setting to turn on the Alfa.

#4 ENJOY

After turning on, the Alfa takes approx. 30 seconds to heat up. While heating the light will blink green. When ready the light will be a solid green.

OFF

Powered Off

LO Constant 190°C / 374°F

MID Constant 210°C / 410°F

HI Constant 220°C / 428°F

A/P Automatic Heat-By-Puff

A/T Automatic Heat-By-Time

LO In this mode the vaporizer will produce vapor at a constant 190°C / 374°F.

MID In this mode the vaporizer will produce vapor at a constant 210°C / 410°F.

HI In this mode the vaporizer will produce vapor at a constant 220°C / 428°F.

A/P In this mode the vaporizer will heat up to 190°C / 374°F at which point it is ready to use. After that the vaporizer will incrementally increase in temperature after every puff until it reaches a maximum temperature of 220°C / 428°F.

A/T In this mode the vaporizer will heat up to 190°C / 374°F at which point it is ready to use. After that the vaporizer will incrementally increase in temperature every 3 minutes until it reaches a maximum temperature of 220°C / 428°F.
USING YOUR ALFA

OPERATION: LED LIGHT STATUS MODES

CHARGING
When the vaporizer is plugged into the wall via the provided charger:
- **Solid Red** - The vaporizer is charging its battery.
- **Solid Green** - The vaporizer battery is fully charged.

**NOTE:** In order to check the battery charge status of your Alfa while it’s plugged in, turn the setting dial to the OFF position.

POWERED ON
When any setting is selected other than the OFF position:

1. **Blinking Green** - The vaporizer is heating up and battery is charged.
2. **Solid Green** - The vaporizer is up to temperature at the selected setting and battery is charged.
3. **Blinking Amber** - The vaporizer is heating up and battery is low on charge.
4. **Solid Amber** - The vaporizer is up to temperature at the selected setting and battery is low on charge.
5. **No Light** - The Automatic Shut-Off feature has powered down the vaporizer or the battery has no charge.

30 SEC HEAT UP | 2HRS BATTERY LIFE |
WORKS WHEN PLUGGED IN | SAVE ENERGY AUTO SHUT-OFF

OPERATION: BATTERY CHARGE

The Alfa vaporizer will run for approximately 2 hours on LO setting. The Alfa takes 3.5 hours to fully charge from no charge. The vaporizer will run for approximately 5 hours continuously while plugged in and in use. The vaporizer can be used after 40 minutes of charge from no charge. This will give you approximately 20 minutes of continuous use without being plugged into a power source. If plugged into a power source the vaporizer will run for approximately 3 hours after 20 minutes of charge.

OPERATION: AUTOMATIC SHUT-OFF

The vaporizer will shut down if no puff is detected within any given 10 minute period regardless of program setting selected.
CLEANING YOUR ALFA IN FOUR EASY STEPS

Goboof recommends that you clean the Alfa regularly to preserve flavor and to keep it in good condition.

CAUTION: The oven gets very hot when in use.

#1 To begin the cleaning of your Alfa remove the mouthpiece to leave the vapor path clear.

#2 Open the oven door and using the cleaning pick provided carefully lift the screen from the oven.

#3 Use the cleaning pick to also remove used tobacco or plant materials from the oven and oven door area. Use an alcohol wipe to clean in and around the oven and oven door area thoroughly.

TIP: If there’s difficulty closing the oven door, use the cleaning pick to remove any material which might be causing restrictions.

#4 Insert the pipe cleaner through the mouthpiece and and push / pull through the oven end. Finish the cleaning by putting the pipe cleaner through the oven end and pulling through the mouthpiece. Repeat as needed.

TIP: Wipe the pipe cleaner with an alcohol wipe for easier cleaning.

When placing screen back into oven use the pipe cleaner to tamp it back into place.
