**STEP 1**
Detach the mouthpiece and filtration chamber to reveal the ceramic oven.

**STEP 2**
Load your Botanical into the ceramic oven.
**STEP 3**

Attach the mouthpiece and filtration chamber back onto the main body, ready for you to vape.

**STEP 4**

Press any one of the button 3 times within 2 seconds to turn on the device, then it will vibrate, and focusvape logo will display on the screen.
**STEP 5**

Press the ▼ or ▲ button to select the temperature unit between Celsius System (°C) and Fahrenheit System (°F). Choose the one you wish and continue to press the buttons for 3 times to enter.

Remark: For each first time after you disconnect the battery from the device, the device will request a selection on the temperature unit as above. (This is because the IC lost the memory data when disconnection the battery)

Press the ▼ or ▲ button to adjust temperature, each press will add/decrease 1 °C or 1 °F accordingly, which will change the numbers on the screen. Continue pressing can fast increase or decrease the temperature.

Just stay on with the Set Temperature you want to vape, release the button, the oven immediately start heating up, wait till the Actual Temperature to be the same as the Set Temperature, while the device will vibrate, now you can start to inhale slowly to enjoy.

---

**ADJUSTABLE AIRFLOW / SEALED AIRFLOW**

Rotate the dial ring on the device to adjust the flow of air, keeping the 3 holes open gives the maximum airflow.

**Important Feature:**

To keep the purest taste, we have separated the airflow pathway from the electronics, so the airflow goes directly from the outside air → the metal (3 holes) → the food-grade rubber → the ceramic oven, then comes to the mesh/ceramic filter → the glass mouthpiece, finally to your mouth!
ATTACH WATER BUBBLER

1) Remove the Borosilicate Glass Mouthpiece from the Focusvape Pro vaporizer
2) Fill the Water Bubbler with water
3) Turn it around and immediately draw to keep the maximum amount of water
4) Attach the Water Bubbler upon the focusvape PRO vaporizer
5) Enjoy the purest vapor.

POWER OFF / AUTO POWER OFF

Continue pressing the ‹ and › button simultaneously for 2 seconds to turn off the device, while the device vibrates one time and focusvape logo displayed.

Each cycle duration of 8 minutes (5 minutes of working + 3 minutes of sleep mode), after that, the device will automatically power off.
MEMORY DATA FUNCTION

When get it on again, it will heat automatically to reach the temperature, which the vaporizer memorized as the same number as last time you close it.

Remark: At each time after you disconnect the battery from the device, for the first time you are going to vape, the device will also request to set up the temperature again as STEP 5. (this is also because the IC lost the memory data when disconnect the battery)

CHARGING

• Charge your focusvape PRO device for 3 to 4 hours initially, the power of the vaporizer will be shown with bars on the battery icon while charging, full power will be shown with a full battery icon.

• focusvape PRO battery also can be removed out from the device and be charged through a separated Li-Ion 18650 wall charger.

• Battery need recharging when battery icon on display flashes 5 times or you can not get heat up the device.

• The device supports a passthrough function.

Attention: In order to preserve the battery life, once the device has been fully discharged, then during the charging process, we have a setting on the software to restrict use the device when battery icon less than 1 bar (because it needs a high discharge current at the heating up)
**SLEEP MODE / WAKE UP**

Each bowl duration of 5 minutes, after which the display is off, the device gets into a sleep mode for another 3 minutes, and the oven stop heating.

In the sleep period, press any button down for 2 seconds to wake up the device, then it get into work mode.

**MAINTENANCE TIPS**

In the case that vapour is not being released, please use the packing tool to gently stir the Botanical in the ceramic oven.

Clean the mouthpiece:
Use a cotton swab and wipe the inner part of the mouthpiece then wipe with a damp paper towel.

Clean the ceramic oven:
Use the brush tool to gently clean the walls of oven

Note: Make sure your focusvape PRO is powered off and cool before cleaning.
WARNING

This device contains Lithium-ion battery, please be sure to discard sensibly. Do not dispose directly into trash. Do not overcharge. Do not short circuit it.

Incompatible chargers may carry a different voltage, which may be a fire hazard, for this reason, we strongly request you use the supplied charger, the use of any charging unit with a different voltage will void the limited warranty offered on this product.
