(FOR GROUND MATERIAL)

G PEN ELITE (for Ground Material)

Getting Started:

1.Register your G Pen Elite
at GPEN.COM/REGISTER using the Serial
Number information located on the
underside of the product packaging.

2.Ensure all components are included:

- 1 G Pen Elite (for Ground Material)
- 1 G Card
- 1 G Pen Tool
- 1 Cleaning Brush
- 1 USB Charging Cable

3. Fully charge the device (minimum of three hours).

4.Remove mouthpiece
by gripping both sides firmly in one hand
and lifting one side upward.

5.Fully load chamber with your preferred ground material.

6.Power on device by pressing front panel button five times (press five times again to turn off).

Device will automatically shut off after 40 seconds, if heat-up has not been initiated.

Device will automatically shut off after five minutes, if heat-up has been initiated.

7.Use side buttons to select your preferred vaporization temperature:

Choose any temperature between 200° and 428°F (93° and 220°C).

Hold front panel button and upper side button simultaneously for Celsius.

Hold front panel button and lower side button simultaneously for Fahrenheit.

8.Hold front panel button down for one second, release, and wait.

Once the LED display indicates that your selected temperature has been reached, inhale and enjoy!
