

Arktis A126 Size Guide

The A126 Under body armour shirt or 'UBACS' for short, is a lightweight base layer. The body is made from eyeleted polyester which is highly breathable and flexible. For those who want a looser fit, it may be wise to order a size bigger.

It's always best to measure an existing garment to get an accurate size.

Note: Our garments are hand made by people, not robots. Please allow a 1.5cm tolerance to measurements.
