

Arktis A192 Size Guide

The A192 is designed to be worn as an outer emergency layer, or underneath a smock over base layers. Because of this, the garment is built loose to aid mobility.

If you prefer a tighter/ tailored fit, or plan to wear minimal layers, it may be wise to order a size down.

It's always best to measure an existing garment to get an accurate size.

Note: Our garments are hand made by people, not robots. Please allow a 1.5cm tolerance to measurements.

Size

Wearers Chest (Including Layers)
