

Arktis C222 Size Guide

The C222 trousers are 'true to size'. This means that our measurements are accurate and a 32" pair will actually measure 32 inches around the waist band. If you are familiar with fashion sizes, it may be wise to buy the next size up.

Inside leg length measurements are measured from the crotch seam to the ankle hem.

It's always best to measure an existing pair of trousers to get an accurate size.

Waist Sizes

Waist Size Inches	28"	30"	32"	34"	36"	38"	40"	42"	44"	46"
