Customization

The Simplest and Most Powerful Customization System

Customization

Fully customize your lectern, anytime

Easily customize your lectern by getting one or more modules, from a microphone connector to a power outlet.

How does it work

The Most User-Friendly Customization System

You get complete control: we have prepared the lectern's top shelf with 2 to 4 slots that can accept any install-yourself module + a central location for a reading lamp. You decide what you want to install and where you install it.

Installation of any module is a snap! No technical skills required, no drilling, no welding.

A welcomed relief

No technical headaches, customize anytime

Everything is simpler: You can adapt to any changes. No headaches on your actual needs and no guessing about your future needs! You will always be able to configure the lectern.

No obligations

Don't need any customization? You are still covered

Blank plates neatly covering the slots are included with any lectern. Your lectern always looks sharp and nice.

Check the lectern's description to see how many modules it can accept (The Y5 lectern can not accept install-yourself modules).
