

WE DO WINDOWS

SWEEP UP PROFITS

The power of microfiber combined with a lightweight handle makes for one efficient cleaning tool. Microfiber can absorb up to seven times its weight and is ideal for mopping on multiple surfaces such as wood, tile and laminate. The light weight extension handle extends 57" and the 18" wide pivoting head can angle to reach the most challenging areas of your home. Environmentally friendly, using microfiber requires no chemicals and is machine washable. Plus reusable covers eliminate waste associated with other disposable mop heads.

The Power of Microfiber

Eye Appealing Color
America's favorite color

Fast and Easy
Ideal for wet and damp mopping. Great on wood, laminate and tile floors.

Chemical-free Cleaning

No chemicals needed- use with plain water.

Environmentally Friendly

Machine washable and reusable microfiber cover means no components to throw away after use.

Clean Without Fatigue

Lightweight with an adjustable handle to make mopping a breeze for everyone.
