3 Stage Professional System PW₃

- Step 1. Tap water flows into the Carbon/KDF prefilter to begin the anti-scaling process and remove chlorine in the water supply.*
Step 2. The Reverse Osmosis Membranes separate water and remove 92% to 95% of total dissolved solids.
Step 3. The De-Ionization Cartridge removes the remaining total dissolved solids, producing water that is 99.99% pure.
