LEVITATE™

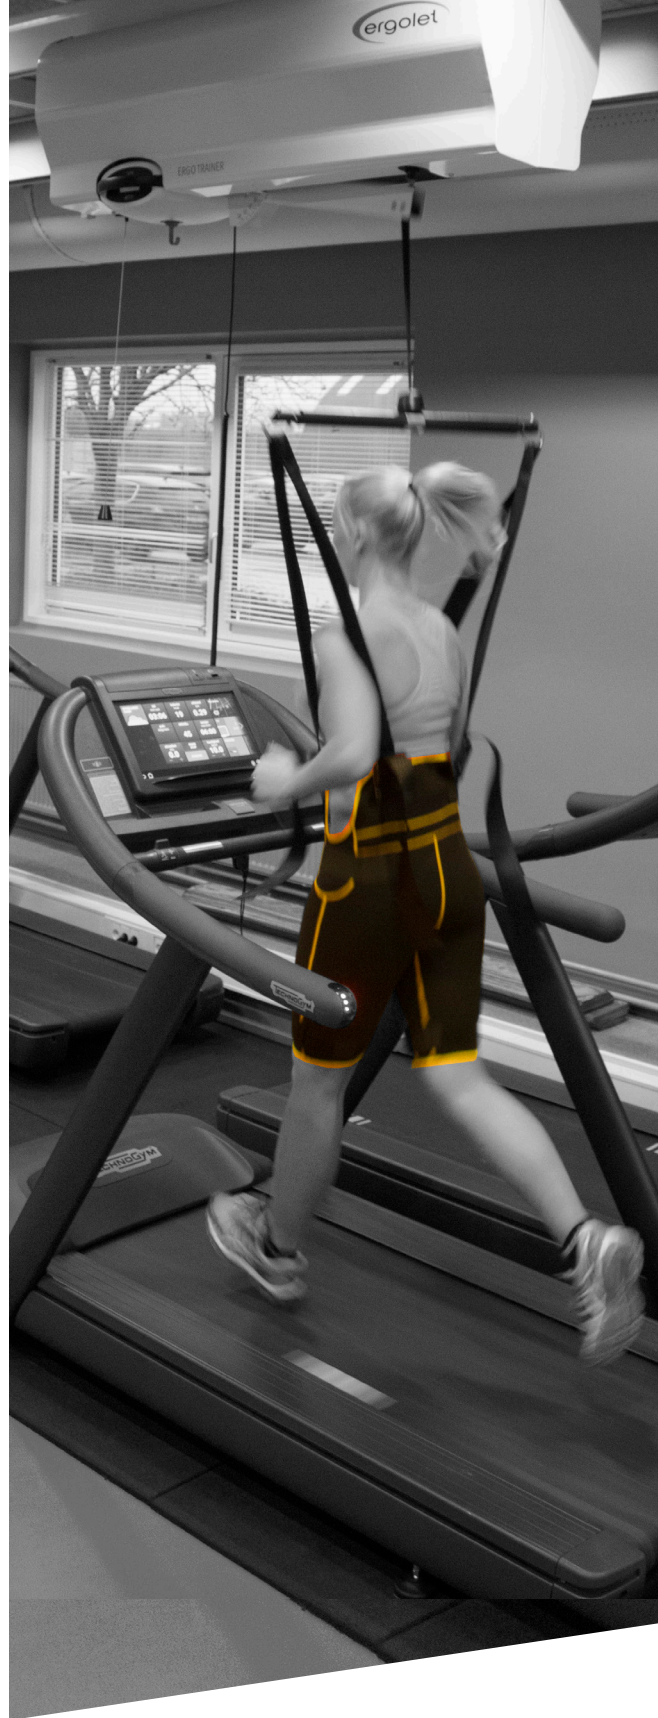

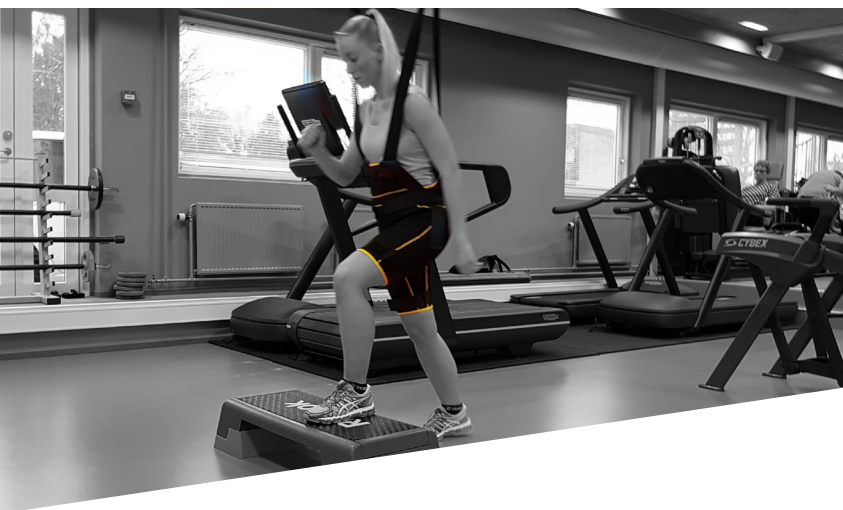

Tights for ERGOTRAINER

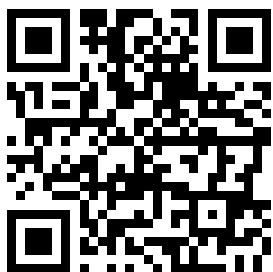

LEVITATE™ makes it possible to start and intensify rehabilitation at an earlier stage after a foot-, knee-, hip- or back injury.

Due to LEVITATE™'s high comfort, it is possible to increase:

- weight relief
- running/walking distance
- the amount of functional exercises

Combined with ERGOTRAINER's flexible tracking system it is possible to train on a treadmill or a stair climber but also floor exercises, such as balancing, catching and sit to stand exercises.
