

4-WAY TEMPORARY ANCHOR PLATE

This Multi-Directional Roof Anchor offers temporary support for one worker in fall arrest or two workers in fall restraint. The four directional connection points increase the working range when detaching and reattaching to connection points and doubles as a handle. They nest perfectly for carrying multiple anchors at the same time.

Key Features

- Easy to Install
- Lightweight
- Supports 1 Worker in Fall Arrest, or 2 Workers in Restraint
- Versatile - 4 Connection Points
- Can be Connected to Wood, Concrete, and Metal
