

# CROSS ARM STRAPS

The Cross Arm Strap is one of the most cost effective and versatile anchor options available on the market today. The anchorage point can be looped over a steel support beam, structural wood member, or any structure deemed suitable by a competent person. Once the small D-Ring is pulled through the pass-thru loop (the larger D-Ring), you have an anchor point that is both ANSI and OSHA compliant. The heavy duty wear pad protects the structural webbing against abrasion helping to increase service life, and the Malta Dynamics signature colors make it easy to locate even from ground level. The Cross Arm Strap is compatible for use with all ANSI rated lanyards and SRLs.

## Key Features

- Increased Durability with Dual Reinforced Webbing and Heavy Duty Stitching
- The Heavy Duty Wear Pad Helps Protect the Structural Webbing Against Abrasion and Snags
- Malta Dynamics' Signature Colors Increase Visibility
- Standard Size D-Ring and Large D-Ring for Easy Pass-thru
- Meets OSHA 1910, OSHA 1926 Subpart M, ANSI Z359.1-2007 and ANSI A10.32-12
- ANSI Worker Capacity Range: 130-310 lbs.
- Material: Polyester and Alloy Steel
- Minimum Breaking Strength: 5,000 lbs.

Part #	Part Name	Weight
A6350	4' Cross Arm Strap	1.2 lbs.
A6351	6' Cross Arm Strap	1.5 lbs.
