

Cymbomute Pro360° Press Release. August 2017.

Announcing! the Next Generation Cymbomute. Cymbomute Pro360° - it's been a long time in development!
Cymbomute Pro360° is made from a brand-new and innovative:
Fabric & Silicone hybrid material with Silicone Bumper Technology (S.B.T.)

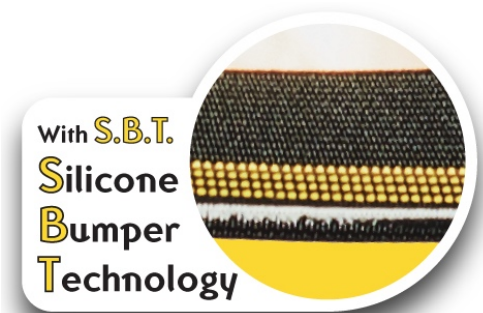

Never has a 360° Cymbal mute been so highly engineered.

Since 2013, Cymbomute has been leading the way in innovative ways to mute your cymbals for practice. Cymbomute practice mutes allow drummers to "Keep the Feel – Cut the Volume" when practicing on their REAL cymbals. Why spend £££ on extra gear like low volume cymbals, electronics, or dull feeling pads? Cymbomute: No 'pad-aim' No 'rubbery rebound' – just play!

The Cymbomute Pro360° has a built-in silicone bumper to receive stick impact - leaving the fabric to do the sound absorption. Also featured is a four-strand yellow reinforcement stripe under the silicone to highlight the bumper – it looks great! The added technology, durability, and aesthetics of this mute mean it firmly deserves the 'PRO' moniker.

The same great Cymbomute innovation just went up a gear!

Cymbomute Pro 360° is available in 4 individual & versatile sizes:

- 13/14/15" (Hi-Hat / Small Crash) RRP £9.99
- 16/17" (Crash / Small China) RRP £10.99
- 18/19" (Crash / China) RRP £11.99
- 20/21/22" (Large Crash / Ride / China) RRP £12.99

Now Cymbomute comes in three great product lines:

- Cymbomute Pro 360° - With S.B.T. Silicone Bumper Technology.
- Cymbomute® – The Original Fold & Stretch Cymbal mute.
- Cymbomute® **WIDE RIDE™** - The double-width big cymbal mega mute.

More good news! Some models of Cymbomute are now made to fit a wider range of cymbal diameters (10/11/12) (13/14/15) and (20/21/22), even more versatile!

AND... Even more... Due to the growth of the company, Cymbomute products are now **DOWN IN PRICE** across the board.

Cymbomutes are made in sizes 06"-24" So, whatever your set-up – we've got your mutes!

Cymbomute remains 100% British made; to exacting standards using the highest quality strongest fibers and state of the art production methods.
