

JensHansen
GOLD & SILVERSMITH

How to use this chart:

- Only use this guide if the ruler below measures correctly.
- With ring layed on a circle above, find the largest circle where no white is seen on looking through the ring.
- On the order page give the number next to your circle.

While all care has been put into creating the ring size chart. Due to printer variances the chart maybe slightly inaccurate which would greatly affect the ring fitting. To avoid any disappointment and delays we strongly recommend you get a professional sizing from a jeweller. Jens Hansen will not be held responsible for incorrect ring sizing if you use to chart to assess the ring size. To use this size chart place your ring over the black circle. Select the size that has black 'just' touching the inside of the ring all the way around.
