

Blood Conviction

Back cover blurb

When Marie Sykes, a veteran of the Denver Police forensics lab, discovers she botched the testing of a convicted killer's blood sample, she immediately alerts her supervisor—but in checking for further errors, she realizes someone has been tampering with her records. The discovery brings her old adversary, private investigator Peter Grey, to her front door, where he grills her about the case. Grey has been hired by the convicted man's family, and they're determined to prove his innocence. While Marie must confront her lingering guilt and her suspicions that someone in her lab falsified evidence to cause a wrongful conviction, the corruption she and Grey uncover threatens to engulf the highest levels of the police department. Only Marie can find the truth.
