## OUR STORY

### *In the beginning...*

Bold & Noble was born at our kitchen table. Our vision: to create beautifully-made screen prints people would love. While Granny babysat, we worked nights on our first collection—which keeps on growing

### *Designs that don't cost the earth...*

...in both the financial and ecological sense. We make products that stand the test of time, by hand, in the old-fashioned way.

### *Made lovingly in the UK by hand*

The human touch continues through to the production phase. We use traditional methods and all our collaborators UK based. That way we can meet the printers, try out colours and materials until we're happy to press the big green button.
