The Nebulus Emergency Flotation Device is a flotation system FOR TEMPORARY USE IN EMERGENCY SITUATIONS. The device is designed to inflate by a manual trigger. Following inflation, the device PROVIDES FLOTATION FOR THE SEMI-SUBMERGED ATV or SNOWMOBILE AND THREE PEOPLE ONLY for a short period of time. The flotation device is not for use as a life vest or life raft. DO NOT USE THE FLOTATION DEVICE FOR ANY PURPOSE OTHER THAN TEMPORARY FLOTATION IN EMERGENCY SITUATIONS.

Pro's currently using the Nebulus EFD

Matt Johnson - Ice Team Manager & Ice Fishing Guide

"Any Ice angler who plans to use a snowmobile or ATV on the ice should seriously consider a Nebulus System. You won't see an Ice Team machine without one."

Nate Zelinsky - Professional Angler

"Safety is always the first rule of ice fishing and having a Nebulus Flotation Device on my machine provides that safety!"

Steve Worrall - Head - OutdoorsFIRST Team.

"OutdoorFIRST's Team would not head out on the ice without the Nebulus. Even mid winter ice can be unpredictable and the Nebulus insures our safety at all times"

Tony Mariotti - Expert ice Angler & CLAM pro-team member

"I fish a lot of small lakes that have changing ice conditions throughout the season, for that reason, I don't leave shore without a Nebulus device on my rig."

Jason Mitchell - TV Personality & Legendary Ice Angler

"The Nebulus is Peace of Mind. I believe that this product can possibly save lives and greatly increase your chances for survival if the worst happens out on the ice. I keep a Nebulus strapped to my snowmobile where I can reach it."

The Nebulus Emergency Flotation Device

In Action

- Each year in North America an average of 60 people drown when their snowmobiles and ATVs crash through thin ice on frozen lakes and rivers.
- To date over 100 people have been saved by using the Nebulus Emergency Flotation device.
- In Dane County, Wisconsin, where ATV and snowmobile flotation devices are required by law, the Dane Co Sheriff's Dept proudly uses the Nebulus when patrolling the lakes and rivers.
- Offering 1000 pounds of flotation, the Nebulus can support a driver and a passenger above the water line, as well as the tethered ATV or snowmobile just beneath the surface.
