

Aero Bench

The Aero Bench is made with FSC-Certified solid wood. All wood components have distinct grain patterns, making each piece of furniture unique. We recommend cleaning the wood with a damp, soft cloth. The black, powder coated steel base can also be polished with a soft cloth. Do not use abrasive cleaning products.

Preventative Measures:

Ensure the Aero Bench is not exposed to direct sunlight for a long period of time. Spills must be cleaned immediately or this may cause discoloration to the wood and may cause permanent damage.

Shrinking, Cracking, Warping:

Keeping the humidity at an even level throughout the year will prolong the life of your table. Wood is very susceptible to changes in the humidity of its environment, which causes it to expand and shrink. Climate control will minimize this. A level of 40%-55% humidity with an ideal temperature of 70-72 degrees Fahrenheit should be maintained.
