

Munro Bed

Walnut

White
Oak

We envisioned our new Munro Collection for those who like to keep things simple. Considered proportions along with bespoke details like a grooved headboard, softly rounded corners and precision-machined legs lend to designs that shine – day or night. The Munro Bed is a low-profile platform bed with an engineered wood slat support system made to work with any mattress, eliminating the need for a box spring. The result is a minimalist design that proves less is more.

Choose from Walnut or Oak, each with a Zero-VOC, hand-rubbed matte finish, thoughtfully chosen to highlight the unique, organic beauty of the wood grain. Solid wood edge details and solid steel legs mean that these designs are built to last – a good thing because Munro's simple, modernist ethos will never go out of style.

Design Trade Professionals: We aim to keep our designs in stock and ready to ship quickly for projects on a tight timeline. Designs may be customized with COM and alternate finishes (minimum quantities may apply). Visit gusmodern.com for more information about our Trade & Contract programs.

Munro Bed

- Available in King and Queen sizes.
- No box spring required.
- Fits any mattress height, including pillow top.
- Distance from floor to underside of mattress is 10.5".
- Mattress suspension system uses a reinforced wood frame with solid wood slats for durability/comfort.
- Main structure is constructed with engineered wood core for strength and stability, surface-faced with thick, real wood veneer.
- Solid wood details in the corners of the bed frame and edges of the headboard.
- Each bed is finished in Rubio® Monocoat - a durable, matte, oil-based protector designed to highlight the beauty of natural wood.
- Wood finish is certified 0% VOC and is an all-natural, environmentally friendly product.
- Surface can be revitalized as desired. Visit Rubio® Monocoat website for more information.
- Power-coated black steel legs.
- Non-marking tack feet.
- Assembles easily with provided hardware.
- Wood is a natural material, with variations in grain pattern that make each design unique.
- It is normal for solid wood to expand and shrink as a result of variations in environmental humidity. A consistent humidity level of approximately 50% is recommended to prevent cracks and surface splits.
