

Tandem 4 Head Pendant

ASSEMBLY INSTRUCTIONS

THE SAFETY OF THIS FIXTURE IS ONLY GUARANTEED IF THE FOLLOWING INSTRUCTIONS HAVE BEEN OBSERVED. KEEP ALL PACKAGING MATERIALS UNTIL YOU HAVE VERIFIED ALL COMPONENTS AND PARTS

Always disconnect power before working on a lighting fixture. Fixture must not be installed in any position other than shown in instructions. Always use a certified electrician for wiring of fixtures.

1. Determine if you need the 12 inch extension piece. If needed, screw on the 12 inch extension piece to the main stem first, then screw the cover to the top of the extension piece. Pull the wires through the ceiling cover and screw the cover to the vertical stem.
2. Attach the mounting plate to the ceiling or junction box using provided screws (AA) and the provided drywall plugs (if necessary) (A).
3. Connect the matching wires to each other and attach the ground wire to the junction box.
4. Place the cover over the mounting plate and wires, line up the cover holes with the mounting plate holes and secure with the black set screws (B).
5. Install the provided lightbulbs into lampshades. When replacing lightbulbs, we recommend using a **GU10** bulb with a warm glow. Bulb wattage should not exceed 60W or the equivalent in LED. For indoor use only.
