

Upcycle Ottoman

COLLECTION > Limited Edition
UPHOLSTERY > Repurposed Jute

The Upcycle Ottoman is upholstered using a supply of surplus jute bags previously used to transport organic coffee beans. The durable bags, which would otherwise be thrown away, have been repurposed to make an original accent piece. The jute features graphic stencils and logos which identified the original goods, making each ottoman completely unique. Bench-Made in Canada with soy-based, eco-friendly foam.
