

Digislider Quick Release Motor Mount - V2

supplied:

1. Motor Mount
2. Motor Plate
3. Belt
4. 2 x M6 Bolts
5. 2 x Spacers

instructions:

Place the belt over the pulley on the Digislider then attach using the spacers and bolts provided. Tightened securely.

Pull back on the second part where the motor attaches to attain tension. Fasten tightly (If not loose, slightly loosen the bolts with the metal washers on).

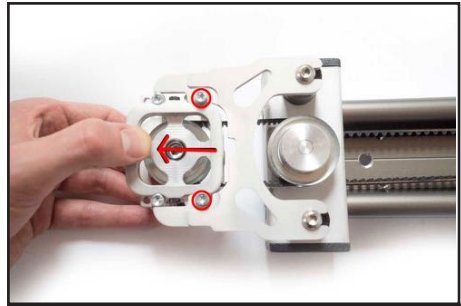

Attach the **Motor Plate/s** to the motor/s, the shaft of the motor should line up with the centre on the plate. Spin the plate around the centre of the shaft to find the appropriate holes. Fasten with the screws provided.

Line up the motor d-shaped shaft with the d-shaped hole in the **Motor Mount**. The motor/s can be pushed on.

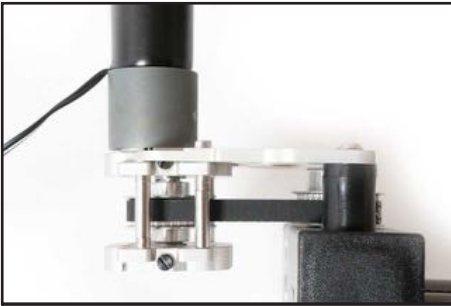

Assembly

1. Attach using the spacers and bolts provided. Tighted securely.

2. Pull back to attain tension & fasten tightly.

3. Attach the **Motor Plate/s** to the motor/s. Line up and push into place.

4. Can be mounted from both sides.
