# ABOUT US

## What is Mole Scram Professional?

Mole Scram Professional is an all-natural granular blend of ingredients: Castor oil, citronella oil, garlic, oil, and peanut hulls.

Easy to use ~ no mixing, just open and use.

## How does it work?

Mole Scram Professional is formulated to target the moles food source by coating the worms and bugs with the castor oil, citronella and the other ingredients. This is an irritant to their digestive system. When the food tastes bad, the mole will search out other areas for their food. Mole Scram Pro is designed to reduce and eliminate mole activity.

## MORE PROFIT! New Add-on Sales Opportunity.

**"YOU'RE ALREADY THERE!"**

Mole Scram Professional easily fits into your application program.

Moles can devastate a lawn and landscaped areas. The homeowner will look to a professional to treat and eliminate the problem.

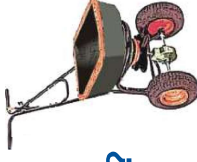

EPIC's full line of granular repellents are recognized nationally with proven results and satisfied customers!

# SELLING THE HOMEOWNER!

## How do Landscape & Lawn Care Professionals Sell the Mole Protection Program to the Homeowner?

1. All natural and safe around children and pets.
2. Will save the homeowner from totally replacing their lawns and landscaping.
3. Eco-friendly. No poisons or harsh chemicals.
4. A **GREEN** solution to mole damage!

## What are the material costs per application and how is it applied?

Mole Scram Professional is applied and broadcasted over the problem areas with a spreader. Simply divide the Mole Scram Pro cost by the square feet of the area you want to cover. This will give you the cost per square foot. 1 pound of Mole Scram Pro will protect 750 square feet.

SPREADER SETTINGS:	
Scott Speedy Green	3-4
Red Devil	4-5
EZ Broadcast Republic	3-4
Quaker Broadcast	3-4
Scott Easy Green	19-21
Earthway Broadcast	12-14

## How do you notify the homeowner of the service?

Marketing materials are available through your local distributor, or directly from EPIC.

The initial applications of Mole Scram Pro are applied 15 days apart over the infested areas, making sure to go beyond the areas by 30 feet. Both applications are at the same rate & coverage areas. Each application must be watered in after being applied.

## ALSO, target the runways by putting Mole Scram Pro through a hole every 10 ft.

A maintenance program every 45 days is recommended thereafter.
