“EASY ACCESS IS THE **PREMIER** SUPPLIER OF HEIGHT ACCESS **SOLUTIONS**, ENABLING **SAFE** AND **EFFICIENT** WORK PRACTICES WORLDWIDE”

REACH IT THE EASY WAY!

Easy Access Co. is NZ's leading supplier of height access equipment. We're a manufacturer, importer, and supplier of height access equipment for the DIY, professional and tradie here and across the world.

Our commitment is to support our customers with safe and compliant solutions for efficiently working at height. Our Kiwi, can-do roots, combined with the scale provided by our export markets, allows us to respond quickly to our customers' needs. The power of our inhouse design and production resources behind us keeps us ahead of global trends and means that we can quickly adapt to any standards and compliance requirements in the access industry.

Our range will continue to evolve as we improve and enhance it, through the addition of new products and innovations to existing ones.

What makes us different is our steadfast belief in our values of innovation, integrity, courage and people.

INNOVATION

We strive for excellence
We're problem solvers, we'll find solutions and continuously improve
We'll keep looking for creative ways to be better, faster, smarter, and more efficient.

INTEGRITY

We do what we say, and say what we mean
We're trustworthy and you can count on our people and products
We'll demonstrate respect and trust.

COURAGE

We're bold, brave, and open – courage gives us power
We're not afraid to be challenged and to challenge the status quo
We're open and resilient.

PEOPLE FIRST

We put people first, caring for safety and wellbeing
We're focused on delivering an easy, seamless experience
We demonstrate transparency and value effective communication.

STORE SUPPORT

Easy Access's store support programme is run by our expert customer care team. We will regularly visit your store and offer the following support to you and your end user customers.

- Instore training on Easy Access products and height access safety compliance requirements.
- Instore signage, display products and merchandising support.
- Representation at, and active contribution to instore promotional events.
- Advice and assistance with ascertaining the specific needs of individual customers.
- On-site consultation, training and product demos with end user customers.
- Instore training at customer events, supported by printed training resources, and certificates for successful completion by participants.
- Regular promotions for stores to offer customers seasonal special deals on Easy Access products.
- Participation in the annual Easy Access blockbuster promotion with high value giveaways driving customers into store.

OUR RANGE

1

Mobile Scaffolds and Platforms

Aluminium mobile scaffolds are set up on castors and designed to be easily moved. They are versatile strong and durable but flexible and easy to use indoors and outdoors. They provide a stable work platform to keep you and your equipment safe for long periods of time. Modular and configurable for a range of jobs. Height adjustable castors support access on uneven surfaces.

2

H-Frame Scaffold Systems

H-Frame scaffolds combine versatile modular frames to create a mobile scaffolding tower. The lightweight aluminium construction along with the snaplock guardrails and braces make it very easy to assemble. These towers are available in a range of heights and widths.

3

Ladders

Easy Access has NZ's widest range of ladders. Perfect for short duration access jobs. Made from both aluminium and fibreglass, and rated up to a whopping 200kg our ladders are compliant on trade sites. Platform ladders are preferable for longer tasks as they have 3 points of contact, a stable work platform, and a handrail.

4

Work Platforms, Trestles and Planks

Work platforms, planks and trestles create quick and easy access for low level work. A range of heights and widths are available, along with a height adjustable option.

5

Industrial Platforms

Easy Access provides a range of NZ made aluminium, heavy duty maintenance platforms to help with maintenance on vehicles and equipment. The platforms are very durable, strong, and easy to use. We manufacture a range of sizes and configurations including cantilever options so you can find the perfect platform to meet your specific needs.

6

Roof Edge / Platform Access Systems

Easy Access' range of roof edge protection modular is very fast to install. It utilizes a cantilever bracket system and is available in 4 standard post heights. It is the ultimate in low level roof edge protection.

MOBILE SCAFFOLDS & PLATFORMS

Easy Access single width Mini Mobile scaffolds have been a favourite of tradies for many years, and are a common sight on construction sites throughout New Zealand.

The modular design allows base models to be easily added to for use at multiple heights. Add-on packs also provide access on uneven surfaces, continuous access around corners, large platforms for ceiling work and can even create a roof edge protection system.

For indoor use, the standard single level Mini Mobile scaffold fits through doorways and will fold down and roll-away for easy storage and transportation.

MM213	MM253	MM313	MM413

MOBILE SCAFFOLDS

SAFETY GUIDELINES

GUARDRAILS ARE REQUIRED ON ANY PLATFORM OVER 1M

MM410 with a 3.7m High Platform includes 6 guardrails - 4 for the upper level and 2 on the lower level as required. Guardrails may only be removed if the scaffold is within 300mm of the working face adjacent the scaffold.

TOEBOARDS

Toeboards are required where an object can fall more than 2m.

OUTRIGGERS

Easy Access Mini Mobiles are supplied with the outriggers as standard where the height to width ratio is more than 2:1 as regulations require for single width scaffolds.

ACCESS LADDERS

Easy Access Mini Mobile platforms may be accessed by the end frame rungs inside the bay. However a separate access ladder is available for the MM410 models if required.

LOCKING CASTORS

Easy Access Mini Mobiles are standard with locking castors, and adjustable castors are also available. Brakes must be securely locked before using the scaffold.

CHECK YOUR SCAFFOLD

Scaffolds should be checked for signs of damage or missing components every time they are assembled.

SCAFFOLD TOWER

The standard of compliance for scaffolds is AS/NZS 1576.

NB. Worksite requirements may vary, and may be more stringent than the legal requirement.

FOLDAWAY RANGE

- Introducing the Foldaway, NZs fastest and most convenient small mobile scaffold.
- Perfect for tradies, home DIYers and anyone who needs a fast, easy and efficient height access solution.
- Versatile enough for both indoor and outdoor use, the foldaway can be stored and transported with ease.
- Made from lightweight aluminium for easy manoeuvrability and rated for up to 225kg.
- A range of accessories can be added to your Foldaway purchase to ensure this scaffold is site compliant (for professional work sites). Once you've used the Foldaway, it's simple to disassemble and fold away for easy storing. This may suggest where we got the name from, the Foldaway is compact and fast with the end frames and folding side brace being one piece. Side clip on guardrails and an access platform come as standard with the base pack.

Perfect for the home handyman

Fits through standard doorways

Folds away for compact storage

SAFEROOF

SAFEROOF FRAME FOR MULTI MOBILE SCAFFOLDS

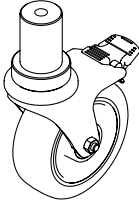

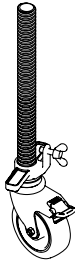

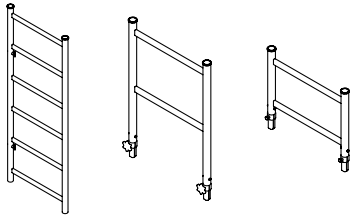

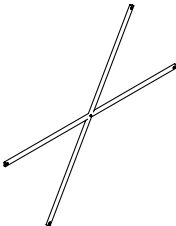

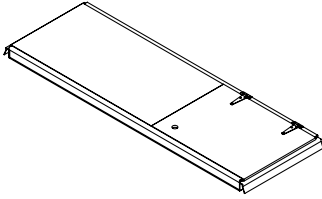

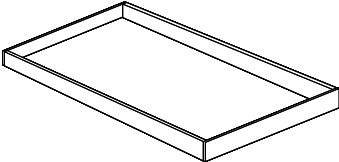

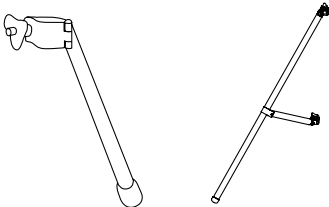

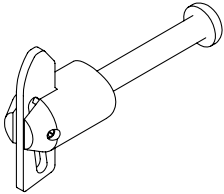

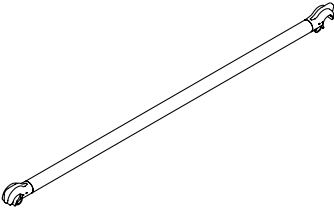

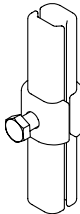

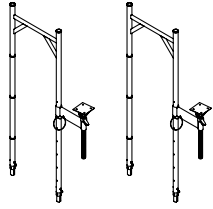

FEATURES & BENEFITS

- Allows access to both the roof and side walls/fascia at the same time
- Provides a very quick and simple way to scaffold out full buildings while providing roof edge protection simultaneously
- This system allows for 225kg to be placed on every deck
- Stairways can be placed at any end to allow easy access for workers and materials
- Toeboards are required for platforms 2m or higher and outriggers for platforms over 4m high
- Some site regulations require toeboards on platforms regardless of height

MMSRP200 SAFEROOF PACK	MGR250 SIDE GUARDRAIL	MGR253 3.0M SIDE GUARDRAIL
Pack includes • 2 Frames • 2 Eave brackets • 2 Swivel top plates • 4 Joining spigots 	• 1.7m long • Clips onto frame uprights above any cross member 	• 3.0m long • Clip onto frame upright above any cross member

H-FRAME SCAFFOLD SYSTEMS

Easy Access is New Zealand's leading manufacturer and supplier of high quality aluminium modular industrial scaffold towers for full compliance onsite.

Easy Access continues to supply the industry with innovative product design and development advances in industrial height access for construction and related trades.

Easy Access supplies two main types of Industrial platforms, The MOBI and H-Frame systems. Both systems are engineered to a robust medium duty 450kg load rating and are available in single (0.8m) and double (1.4m) widths. At just 2m Long the MOBI is very compact for transportation and storage. For a larger work platform, the Heavy Duty H Frame Towers are available standard at either 2.4m or 3.0m long.

**Modular, robust
and fully compliant
for *WORK SITES***

H-FRAME SCAFFOLD TOWERS – THE MOBI SAFETY GUIDELINES

OUTRIGGERS

Required for single width platforms of 3m or higher.
Required for double width platforms of 5m or higher.

TOEBOARDS

Mandatory for platforms of 2m or higher to prevent accidental dislodgement of tools/equipment. Included as standard with Easy Access towers 2mH or above.

PLAN BRACE

(Diagonally bracing the tower base)
Required to retain the horizontal integrity of mobile towers. Included as standard with Easy Access MOBI and H-Frame ranges.

MOVING THE PLATFORM

Mobile scaffolds must not be moved if anyone is on the platform.

SCAFFOLDING TICKETS

Towers with a design height of 5m or above must be erected by a qualified scaffolder.

LOCKING CASTORS

Castor brakes must be engaged before use.

FULL-SURROUND GUARDRAILS AND MIDRAILS

Must be used when the platform is 1m or higher.
(May be removed only when within 300mm of working face and 100mm for a non-working face). All guardrails required are included as standard with Easy Access Towers.

HEIGHT TO WIDTH RATIO

The height to width ratio required for mobile scaffold towers is 3:1 where the work platform is above 2 Mtrs in height and 2:1 below 2 Mtrs.

LADDER

Ladders on mobile scaffolds must access the work platform from within the footprint of the tower.

ACCESS PLATFORM

Scaffold towers must have a fully decked work platform. Easy Access double width towers have fixed and access platforms included as standard. Single width towers include an access platform as standard.

NB. Worksite requirements may vary, and may be more stringent than the legal requirement.

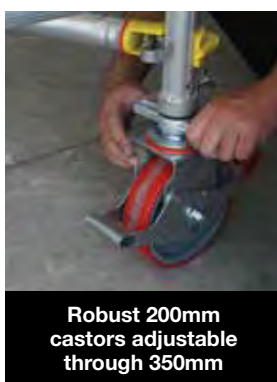

MOBI

Scaffold Towers made **easy**

MOBI COMPACT H FRAME SCAFFOLD TOWER WITH SNAPLOCK ALUMINIUM BRACING

FEATURES & BENEFITS

- Lightweight high tensile aluminium construction
- Simple colour coded componentry for user friendly erecting
- Robust welded design for maximum durability
- Hardy 200mm diameter, fully braked, height adjustable castors (adjust through 350mm)
- Available in single (0.8m) or double (1.4m) widths
- Adjustable for use on a sloping support surface or stairway
- Outriggers included on selected models as required by 'working at heights' regulations
- Optional clip-on ladder available for all models*
- Compact 2m long platform for easy transportation
- Individual components and add-on accessories available
- Huge 450Kg medium duty safe working load per tower

**Robust 200mm
castors adjustable
through 350mm**

H-FRAME SCAFFOLD SYSTEMS

SINGLE WIDTH LONG SPAN MOBI BRIDGE

- Mobi F-Post allows for single width longspan bridge for up to 10 metres of uninterrupted access to work face
- 3m - 6m long span platform, set up in minutes
- 225kg load rating
- Lightweight and easy to handle

Code	Description	Length
LSP300	3m Long Span Platform	3.0m
LSP400	4m Long Span Platform	4.0m
LSP500	5m Long Span Platform	5.0m
LSP600	6m Long Span Platform	6.0m
LSP250	MOBI Guardrail Single Post	
LSP200	MOBI F-Post	
LSH300	3m Long Handrails	3.0m
LSH400	4m Long Handrails	4.0m
LSH500	5m Long Handrails	5.0m
LSH600	6m Long Handrails	6.0m

F-POST allows you to have a single width bridge when using double width towers.

How to choose your Industrial Scaffold

QUESTIONS YOU SHOULD ASK

HEIGHT	What is the maximum height will you be working at? Typically the height of the work platform will be a maximum of 2m lower than the working height.
WIDTH & LENGTH	1. How much room do you have on site for your scaffold? This may determine a maximum length and width for your scaffold. 2. How long will you be 'up there' on the scaffold? This should help determine the width and length of the scaffold you need; A larger scaffold will allow longer time periods between relocation. 3. What are you taking with you? You need to make sure that you have enough space for you, any colleagues and tools on the platform.
BRACING SYSTEM	H-Frame towers feature two bracing system options. Galvanised steel cross braces are simple, low cost and very space efficient for easy transportation. Aluminium snaplock braces are lightweight and offer total flexibility for placement in different configurations.

H-FRAME SCAFFOLD SYSTEMS

INDUSTRIAL H-FRAME SCAFFOLD SYSTEMS

FEATURES & BENEFITS

- Large work surface for bigger jobs
- Can be used without stabilisers up to 2 levels
- Simple componentry for user friendly erecting
- Robust design for durability with hard use
- Height adjustable 150mm 500kg rated castors
- Available in single width 0.8m and double width 1.37m
- Steel scissor bracing with quick and easy Anti-luce latches
- Available in 2.4m or 3.0m platform length
- Huge 450Kg medium duty safe working load per tower
- The toughest and most compliant tower system available in NZ

H-FRAME SCAFFOLD SYSTEMS

INDUSTRIAL HEAVY DUTY H FRAME SCAFFOLD TOWERS WITH SNAPLOCK ALUMINIUM BRACING

FEATURES & BENEFITS

- Aluminium braces snap onto any cross member allowing frames to be set up on slopes and steps
- Extra large work surface for efficient access
- Can be used without stabilisers up to two levels
- Sturdy and stable to work off
- Height adjustable 150mm diameter castors
- Extra robust, thick walled aluminium for durability with hard use
- Colour coded braces for easy identification
- Available in single width 0.8m and double width 1.37m
- Available in 2.4m or 3.0m platform length
