

# FRAMEWORK

## EXECUTIVE

# Integrated Cable Management System

Framework Chiave Executive with Mobile Pedestal (England Oak)

Data storage, power points and telecommunications are key to a company's infrastructure in today's office.

In conventional offices, technology facilities may be less flexible, such as having cables being embedded under carpets or in trunkings.

**Framework Executive** efficiently stores and embeds power sockets and cables within the furniture system, allowing it to be more adaptable to change.

# Quick & Easy Assembly

It is safe, simple and speedy to install and reconfigure **Framework Executive**. All you need is a single tool - the Allen key - to assemble or dismantle the executive workstation.

## Strength and Stability

Designed with users' changes and maintenance in mind, every component has a metal-to-metal threaded anti-slip connection, making the desk fit for "continuous commercial use".

## Quick Assembly with Minimal Components

**Framework Executive** can be quickly and easily reconfigured with a single tool fitting.

## Adjustable Calibrated Beams

Simple and quick to change, **Framework** beams are adjustable to fit table tops measuring 800-1200mm and 1200-2400mm in length.
