

# ORIGAMI

Good coffee always comes from here.

An essential cup in the morning.

A helpful cup letting you into concentration.

A cup with your loved one makes precious time.

A cup may even really change your life.

Just a cup of coffee gives an accent to everyday life,  
connects people and sometimes opens up new doors.

With more delicious cups of coffee, the world will surely  
get rich.

ORIGAMI is always with the barista who brews that cup.

Our hope is to deliver more delicious cups of coffee  
all over the world.

**ORIGAMI**

*with  
Barista!*

Why is ORIGAMI used in so many coffee shops around the world?

ORIGAMI was born from the voice of baristas.

The dripper is carved with vertical grooves that pass air to bring out the best flavor of the beans. Aroma Series controls aroma with its shape designed with calculation. Cup Series supports those who make latte art with its convection structure that is curved inward.

With a wide variety of colors, our product will fit any shop with different atmospheres.

ORIGAMI helps to brew delicious coffee.

That is why ORIGAMI is supported by baristas around the world.

We deliver to baristas around the world from Japan's largest pottery-producing center.

All ORIGAMI products are made in Mino, Gifu, which is the largest center of ceramic-producing in Japan.

Koyo Toki is responsible for the manufacturing process. Founded in 1964, the professional ceramics manufacturer has been working on Western and Japanese tableware for domestic hotel restaurants for about half a century.

The manufacturer provides stable high-quality products by the fusion of their proud craftsmanship and technology using the latest equipment.

From here, we deliver ORIGAMI products to baristas around the world.

# Dripper

## Vertical grooves of the dripper that supports extraction

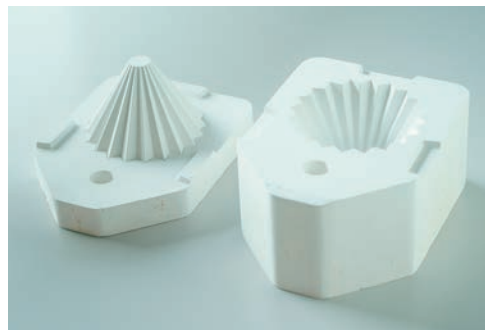

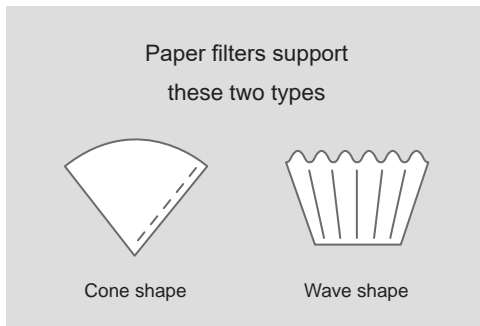

The biggest feature of ORIGAMI Dripper is the vertical grooves carved at equal intervals. Twenty grooves of a precisely-calculated depth provide a path for air between the dripper and the paper. This stabilizes the speed of hot water flows down and supports the ideal extraction for baristas.

## Porcelain material and conical structure suitable for extraction

ORIGAMI Dripper is made of ceramic.

The material is suitable for coffee extraction because of its high thermal conductivity and heat retention performance.

In addition, the precise “conical structure” allows the powder to soak in hot water for a longer time, absorbing sufficient moisture. As the fragrant powder swells, it brings out the original flavor of the beans.

# Dripper S

2,300 yen  
 Dia.115x70H / Bottom Hole Dia.25 (1-2 cups)  
 Material : Porcelain / Microwave and dishwasher safe / Made in Japan

ORIGAMI Dripper looks like a folded origami with its bright color and vertical grooves. Twenty grooves create a space between the dripper and the paper, smoothing the drainage of hot water and realizing a variety of extractions. We have arranged a wide variety of colors.

# Dripper M

2,500 yen  
 Dia.140x87H / Bottom Hole Dia.25 (2-4 cups)  
 Material : Porcelain / Microwave and dishwasher safe / Made in Japan

M size is for 2-4 cups. It is perfect for household use requires a large number of cups as well as at a shop. You can choose from a wide variety of colors, so you will surely find your favorite color.

# Dripper Air S

1,200 yen

Dia.118x70H / Bottom Hole Dia.25 (1-2 cups)

Material : ASResin / Dishwasher safe / Made in Japan

The Air is tough, lightweight, rigid, and impact-resistant. Not even a scratch will show up even if you are a little rough with it. It can be used for the brewing in any situation.

The trademark ORIGAMI ribs(gap) have been retained, and the AS resin construction further stabilizes the brewing at a high level by preventing the hot water from losing its temperature.

145x120x120H 710cc (when full)

Material : Heat-resistant glass / Heat resistant up to 120° / microwave and dishwasher safe / made in China

\*Please note that it cannot be used with the Teapot Stainless Lid

This ORIGAMI original server is based on the famous HARIO server, the only manufacturer of heat resistant glass in Japan. A glass handle is attached to the server to create a sense of unity, and the ORIGAMI dripper stands out with its simple design.

The shape of the server with a bulged bottom makes it easier to feel the aroma, and is frequently used in competitions. This is a server that is easy to use in the store or at home.

Stable extraction even without a holder  
The upper radius fits the ORIGAMI Dripper perfectly. Enables stable extraction even without a holder.

## Aroma Series

Enjoy aroma like never before with a shape calculated in every detail.

“Aroma Series” is to enjoy the aroma of coffee.

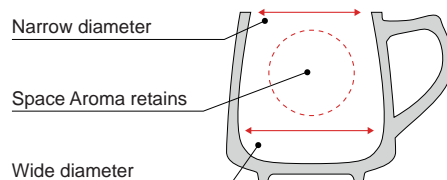

The mug features its shape that spreads toward the bottom and curves inward at the brim.

This unique shape makes space for aroma retention and does not let it out.

The three lineups; “Aroma”, “BARREL Aroma”, and “PINOT Aroma” have slightly different angles when they touch the mouth.

This makes a difference in how coffee touches the tongue, making it possible to enjoy the multi-faceted taste of coffee from various angles.

This series is highly recommended for those who want to enjoy the aroma of coffee as if they were enjoying wine.

---

## Aroma Mug

1,600yen

120x90x82H 320cc (when full)

Material : Porcelain / Microwave and dishwasher safe / Made in Japan

Among the three types, "Aroma" has the shape that raises the chin most when drinking coffee.

Coffee flows into your mouth quickly and touches the back of your tongue, making you feel stronger acidity.

# Cup / Latte Bowl

---

Realize the optimum balance by changing the inner thickness

The pattern and shape of the cup tend to attract attention, but we also focus on the “thickness” that supports quality. The thickness of ORIGAMI cups is adjusted at each side instead of making it even.

For example, the brim is made thin and soft while maintaining strength, and the bottom is made thick to improve strength and heat retention.

“Convection structure” that supports latte art making

Look into the cup and you will notice that the cup curves slightly from the brim to the bottom.

By avoiding a straight line, we have realized the “convection structure” of the cup in which espresso and milk mix smoothly.

This structure supports making latte art with beautiful contrast.

Furthermore, appropriate convections enable pouring coffee with wrapping up the aroma, creating a different cup like never before.

Comfortable handle for everyone

The cup handle is the key to the operations of making drinks and latte art. ORIGAMI cups have a compact handle so that everyone can easily hold it.

The handle is still excellently stable and does not make you feel the weight of the cup.

Your guests will surely feel comfortable when drinking.

## Sensory Filter Cup

1,300yen

Dia. 88x88H 290cc (when full)

Material : Porcelain / Microwave and dishwasher safe / Made in Japan

The flavor and characteristics of the ingredients of hand-drip specialty coffees can be fully appreciated. The rim of the cup is thinner than a typical cup, allowing the delicate flavors of specialty coffees to be fully appreciated. When you slowly sip the coffee, it flows from the back of your tongue to the side, allowing you to enjoy the clean acidity of the specialty coffee. The gently curved inner shape is designed to trap the aroma inside the cup by pouring coffee to about 1/3 of the cup, allowing you to feel the mellow aroma when you bring it close to your mouth.

WHITE

BLACK

Many of the traditional espresso cups are traditional Italian designs. By focusing on a shape that does not exist in ready-made cups, we have designed a cup that allows you to enjoy espresso in a wider range of ways, depending on how the coffee beans are refined and the degree of roasting.

## Series of Japanese tea items ORIGAMI Tea

ORIGAMI and Saten Japanese tea collaborated to create this series of Japanese tea items. This series of simple items that allow you to easily enjoy authentic tea can be used by professionals as well.

## Items with a traditional tea ceremony atmosphere and craft-like gentleness

The ORIGAMI TEA lineup includes products for the modern tea ceremony scene, such as matcha bowls shaped to make it easy to prepare matcha and create a fine form, and new items that allow you to enjoy Japanese tea just like a coffee dripper. The ORIGAMI TEA series is attracting attention not only in Japan but also from overseas.

# Tea Whisk Stand

1,000yen  
 Dia.60x40H Material : Porcelain(Re-stone) / Dishwasher safe  
 Made in Japan

A modern arrangement of the traditional glazed tea whisk stand with ORIGAMI's unique color variation. It is a convenient tool for maintaining and storing the shape of the tea whisk. When the Chasen stand is turned the other way, you can stand the handle part of the Chasen.

# Tea Whisk

3,600yen  
 Dia.60x105H  
 Material : Bamboo / Not for use in dishwashers and dryers. / Made in China

This is a tea utensil used for making Matcha (powdered green tea).  
 Please note that each Chasen is finished by hand and the texture and pattern on each one is different.

---

## Pinot Flavor Cup

1,200yen

Dia.77x75H 210cc (when full) Material : Porcelain / Microwave and dishwasher safe / Made in Japan

PINOT aroma flavor cups are now available with a Japanese-style glaze as a tea item that matches with tea. The use of a new stone-like material called "Re-stone," which is strong enough to withstand the rigors of commercial tableware, and the original clay color of the material, creates a more craft-like atmosphere, giving the item a sense of warmth that is different from porcelain.

# Pinot Flavor Bowl

1,200yen

Dia.85x60H 210cc (when full)

Material : Porcelain / Microwave and dishwasher safe / Made in Japan

This ORIGAMI matcha bowl has a Japanese glaze based on the design of the PINO Aroma Flavor Cup. It can also be used as a cup for matcha latte.

The use of a new stone-like material called "Re-stone," which is strong enough to withstand the rigors of commercial tableware, and the original clay color of the material, creates a more craft-like atmosphere, giving the item a sense of warmth that is different from porcelain.

## Matcha Bowl Small

2,500yen

Dia.95x55H 230cc (when full)

Material : Porcelain / Microwave and dishwasher safe / Made in Japan

It can be used as a cup for sharing matcha brewed in a katakuchi matcha bowl with several people, and other matcha-based dishes to suit your current lifestyle.

The cup has an indentation at the mouth, which blends well when the lips are applied to it.

While maintaining the traditional coloring and shape of the matcha bowl, the size of the bowl can be held in one hand, allowing you to enjoy the world and atmosphere of the prestigious tea ceremony while enjoying a new taste of matcha menu.

## Matcha Bowl

3,500yen

145x130x80H 540cc (when full) 1-2 cups of regular matcha (thin tea).

Material : Porcelain / Microwave and dishwasher safe / Made in Japan

The bottom of the cup has a rounded bottom suitable for brewing and kneading, making it easy to brew smooth forms of matcha (thin tea), and it can also be used to quickly knead small amounts of matcha or thick tea for matcha lattes, etc.

The tapered mouth makes it easy to hold and pour, and at the same time, the liquid returns to the inside of the cup when the matcha is being brewed, preventing spills and making the form more finely textured.

The use of a new stone-like material called “Re-stone,” which is strong enough to withstand the rigors of professional tableware, combined with a matte glaze with a warm texture, gives the item a traditional tea ceremony atmosphere and craft-like gentleness.

# Tea Dripper

2,300yen

Dia.115x57H Bottom hole Dia.45

Material : Porcelain(Re-stone) / Dishwasher safe / Made in Japan

This is a permeable tea dripper for hand-drip extraction, developed based on the know-how and experience accumulated in the development of coffee drippers.

Unlike the conventional immersion type, the extraction can be varied by the speed at which hot water is poured, allowing tea to be brewed freely according to one's mood and preferences, such as a clear, refreshing taste or a firm, bold taste.

MATTE BLUE

\*Please see P11-12 for holders to be used with tea drippers

# Tea Pot

4,500yen

125x115x70H 280cc (when full)

Material : Body, Lid : Porcelain / Dishwasher safe / Made in Japan

Tea strainer : Stainless steel / Not for use in dishwashers and dryers. / Made in Japan

The flat bottom of the Tea pot(Kyusu) body and the tea strainer allow tea leaves to spread throughout the tea strainer without wasting any of the tea's components, instead of clumping together like in conventional round-bottomed tea strainers.

The handle is located perpendicularly to the spout, so pouring is as easy as turning your wrist as with a conventional tea pot'(Kyusu). The tea pot(Kyusu)can brew 200 ml of tea at a time, making it suitable for one or two people.
