- Voltage: DC 12V
- Color Of Light: Red
- Waterproof: IP67 Rated
- LEDs: 150PCS
- Diameter: 13.8 inch (350mmx350mmx23mm)

INSTALLATION STEPS

STEP 1

Remove your spare tire using a 19mm socket.

STEP 2

Open the rear cargo door and remove the 4 screws holding the factory 3rd brake light in place using a T20 Torx driver.

STEP 3

Unplug the factory 3rd brake light

STEP 4

Set the spare tire brake light on the studs of the spare tire mount. Make sure that the wire is in the upper position to ensure you have enough length.

STEP 5

Plug the factory 3rd brake light in to the brake light ring harness, Plug the brake light ring into the factory harness

STEP 6

Reinstall back the plastic shell of the high brake light and the spare tire. The installation is complete.
