- Operating Watt: 5W
- Voltage: DC 12V
- Color Of Light: Red
- Waterproof: IP67 Rated
- LEDs: 120PCS
- Diameter: 13.8 inch (350mmx350mmx23mm)

INSTALLATION STEPS

STEP 1

Remove the third spare tire

(Note: Be careful not to damage the camera in the middle.)

STEP 2

Remove all the screws of the third brake light.

STEP 3

Use a plastic screwdriver to separate the plastic plate of the high brake light.

STEP 4

Unplug the original plug of the car

(Note: Pull out the pin as the pic shows first, and then pull out the plug.)

STEP 5

Insert the plug of the spare tire lamp into the high brake lamp, the male plug into the original plug, and place the plug as the figure shown.

STEP 6

Install back the plastic plate of the high brake light and tighten the screws. Installation is complete.
