Balance Kit

Balance Orthotic Styles

Classic-

The Classic Balance is universally popular and is available with a 3/4, sulcus or full length top cover.

Heel Pain-

The heel pain Balance is a condition specific device made using the Carbon shell whilst retaining all the functional properties of the Classic device.

However, a hole is milled into the heel and filled with low density material and then covered. This provides an area to reduce the pressure just over the Calcaneus to re-distribute pressure away from the fat pad
