

# How to read a chart

A flat chart is read from right to left then left to right.  
 You start at the bottom and work your way through the rows to the top.

This uneven edge shows you that your stitch count changes after each odd row.

I find it helps to colourcode the decreases.

I use highlighter pens and know that pink is SSK and yellow is K2tog

Arrows showing which way each row should be read  
 Row 1 (RS): Right to left  
 Row 2 (WS): Left to right

Charts are read from bottom to top
