BEAM

LIFX.COM

# Get started...

Start by unpacking the pieces contained in this box. Inside you will find...

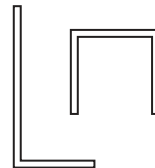

# Quick set up.

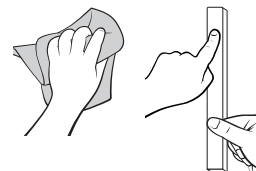

## LAYOUT IDEAS

Choose your layout—Beams magnetically snap together and apart so you can find your look easily.

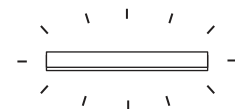

## PREPARE & STICK

Peel off the sticker backs from the Command Strips™ and affix Beam to the wall one piece at a time. Each Beam will touch the next closely without gaps.

## ILLUMINATE

When all of your Beam pieces are connected, turn the power on and use the App or voice to control. Enjoy!

## Tips.

### PLACE BEFORE POWERING

To ensure correct operation of your Beams, mount them all in sequence before turning the power on.

### PLACE, PRESS & HOLD

Each time you affix a Beam to the wall, press & keep firm pressure for 30 seconds to ensure it is secure. It should not wobble & will feel secure when it is affixed.

### DECOR OR FRAME

Beams are designed to work as a framing device for architectural elements like windows and doors or to stand alone as illuminated wall art.
