

BIODEGRADABLE GLITTER - SPRING GREEN

Product Information Sheet

Biodegradable Cosmetic Glitter consists of precision cut highly reflective specialised regenerated cellulose film that is proven to biodegrade very well in natural environments. It is available in a wide range of colours and sizes. It is suited to dry, water-based and oil-based applications and complies with the cosmetic regulations of all major regions.

ECOLOGICAL CREDENTIALS	
Biodegradability	<p>Biodegrades well in natural environment ISO 14851 test - 87% biodegradation in 28 days OECD 301F Test - Readily Biodegradable, 93% biodegradation in 28 days</p>
Environmental Safety	<p>Complies with environmental safety criteria as per OK biodegradable WATER standard. <i>(Ecotoxicity in aquatic environments is part of the OK biodegradable WATER certification process)</i></p>

- - Compatible with good resistance
- - Test - Compatible with possibility to bleed in some conditions. Excess heat may cause dulling of the glitter
- - Not compatible

Given the many possible uses and formulations incorporating glitters, it is the responsibility of the formulator to test performance in both formulation and application before final use.

Shelf Life – Biodegradable Glitter in natural state (as supplied) has an indefinite shelf life. Providing that it is stored in a dry, dark, cool environment, out of direct sunlight, any direct heat source and not exposed to microorganisms. However, for good manufacturing practice, we would recommend using the product within 3 years to ensure optimum condition.
