

TETHER

2019 METAMORPHIC COLLECTION

EXPLORING FORM, SPACE & DESIGN

Tether was made as an experiment to glimpse into a future unknown, inspired by a passion for machines, science fiction and architecture. With each piece of jewelry we hope to take you on a journey to A Different Future, To An Other Reality.

2019 METAMORPHIC COLLECTION

METAMORPHOSIS: Abrupt change in body structure through growth and differentiation. The word metamorphosis derives from Greek μεταμόρφωσις, "transformation, transforming", [2] from μετα- (meta-), "change" and μορφή (morphe), "form".

Tether Metamorphic is the exploration of the shifting of shapes that exist in our manufactured world. This collection is our homage to the changing, illusionary structures and beings we are inspired by, and the stories they tell.

WEIGHTS MODERN HOOPS CLICKERS

GETHEN

SKU 1100-0003 4 COLORS 1 SIZE

Gethen is the fictional planet in Ursula Le Guin's novel, The Left Hand of Darkness. Individuals on Gethen are ambisexual, with no fixed sex. On this planet there is no division of humanity; one is respected and judged only as a human being. This three-sided design is our tribute to this seemingly utopian place.

- One size 15mm inner diameter (triangle) x 9.5mm thick
- Must be 00 Gauge or larger to wear
- Cast in 316L Stainless Steel
- Weight: 8g
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

PORTAL

SKU 1100-0002 4 COLORS 1 SIZE

The Portal is made of continuous strands of jewels with a hidden hinge that mimics the endless facets of crystals. Here, we have created a crystal portal which you can adorn on its own or as linked pieces.

- One size 15mm inner diameter x 9.5mm thick
- Must be 00 Gauge or larger to wear
- Cast in 316L Stainless Steel
- Weight: 9.5g
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

PROTEA

SKU 3000-0005 4 COLORS 2 SIZES

The Protea is a South African flower named after the shapeshifting Greek sea god Proteus, who could change his form at will. We were inspired by the beauty of this flower, and designed the petals to be faceted on the outer radius, which catches the light and creates movement in the jewelry itself.

- Two outer diameter sizes 50mm (L) & 28.5mm (S)
- Weight: 14.7g (L) & 2.9g (S)
- Cast in 316L Stainless Steel
- Must be 16 gauge or larger to wear
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

WINDROSE 11

SKU 1000-0025 4 COLORS 2 SIZES

In an alternate universe, our classic wind rose compass would possess eleven points instead of the twelve that exists in this world. In our alternate reality, the imbalance and rebellion of this world would equate calm and serenity. This tapered cuff is decorated with eleven points that radiate outwards into a design that can be worn reversibly to create two distinct styling effects.

- Two diameter sizes 8mm / 9.5mm
- Cast in 316L Stainless Steel
- Available in 14 Gauge (1.6mm) only
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

PENROSE

SKU 1000-0019 4 COLORS 2 SIZES

Lionel Penrose, along with his son Roger Penrose, created two of the more notable impossible objects, the Penrose Tribar and the Penrose Stairs. An impossible object, also known as an impossible figure or an undecidable figure, is a type of optical illusion. It consists of a two-dimensional figure which is instantly and subconsciously interpreted by the visual system as representing a projection of a threedimensional object. Our Penrose is a system of crosshatch linework that weaves into faceted points anchored in a system of repeating patterns that join in the center.

- Two diameter sizes 8mm / 9.5mm
- Cast in 316L Stainless Steel
- Available in 14 Gauge (1.6mm) only
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

FLUX

SKU 1000-0021 4 COLORS 2 SIZES

Flux is the measurement of energy flowing in or out of an object or mass. Our Flux design is made up of sharp, tapered lines that meet geometric panels, achieving a perfect equalibrium between camber and plane.

- Two diameter sizes 8mm / 9.5mm
- Cast in 316L Stainless Steel
- Available in 14 Gauge (1.6mm) only
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

SLIM CLICKERS

JANUS

SKU 1000-0024 4 COLORS 2 SIZES

In ancient Roman religion and myth, Janus is the god of beginnings, transitions, duality, passages, and endings. He is usually depicted as having two faces, as he looks to the future and to the past. The lines on this subtle hinge clicker emulate the duality of having two faces. This low profile design can be worn both as a stand alone piece or in a stack with mulitple pieces.

- Two diameter sizes 8mm / 9.5mm
- Cast in 316L Stainless Steel
- Available in 14 Gauge (1.6mm) only
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

VITA

SKU 1000-0020 4 COLORS 2 SIZES

An homage to our favorite Virginia Woolf novel, Orlando, which was mostly inspired by her lover and close friend Vita Sackville-West. In her story, Orlando simply falls asleep as a man and wakes up as a woman. "He stretched himself. He rose. He stood upright, and... we have no choice left but confess- he was a woman... The change seemed to have been accomplished painlessly and completely and in such a way that Orlando herself showed no surprise at it." A simplistic design with clean, grooves that meet symmetrically in the middle, this design is our salute to these literary legends.

- Two diameter sizes 8mm / 9.5mm
- Cast in 316L Stainless Steel
- Available in 14 Gauge (1.6mm) only
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

HALO

SKU 1000-0022 4 COLORS 1 SIZE

Halo is the name for a family of optical phenomena produced by sunlight interacting with ice crystals suspended in the atmosphere. Halos can have many forms, ranging from colored or white rings to arcs and spots in the sky. The ice crystals responsible for halos are typically suspended in clouds, and behave like prisms and mirrors, refracting and reflecting light between their faces, sending shafts of light in particular directions. Our Halo design is a minimal, flat perfect ring designed specifically for stacking to create a unique layered effect.

- Two diameter sizes 8mm / 9.5mm
- Cast in 316L Stainless Steel
- Available in 14 Gauge (1.6mm) only
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

HYDRA

SKU 1000-0023 4 COLORS 2 SIZES

Hydra of Lerna, more often know simply as Hydra of ancient Greek and Roman mythology, was a serpentine water monster that dwelled at the gates to the Underworld. Hydra possessed many heads, the exact number of which varies. It is said that its heads would regenerate and regrow if an enemy were to cut them down. Our interpretation of this ancient beast is shown here with contrasting lines weaving and wrapping around each other.

- Two diameter sizes 8mm / 9.5mm
- Cast in 316L Stainless Steel
- Available in 14 Gauge (1.6mm) only
- Available in Naked Steel, ion plated yellow gold, ion plated rose gold & high quality PVD-fused black

SKU 5000-0001 3 COLORS 1 SIZE

Aster comes from the ancient Greek word $\Box \sigma \tau \dot{\eta} \rho$ (astér), meaning "star". The English word Astronomy (from the Greek ἀστρονομία from ἀστρον astron, "star" and -νομία -nomia from νόμος nomos, "law" or "culture") means "law of the stars". The Aster 00 is our pointless star and the first of a series of solid 14K gold ends.

- Diameter size 8mm
- Available in: 16 gauge thread / 14 gauge thread / universal pin
- Cast in solid 14k Gold
- Available in 14k White Gold, 14k Yellow Gold, 14k Rose Gold

SKU 5000-0004 3 COLORS 1 SIZE

The development of astronomy by the Greek and Hellenistic astronomers is considered, by historians, to be a major phase in the history of astronomy. Greek astronomy is characterized from the start by seeking a rational, physical explanation for celestial phenomena. The Aster 04 is our four-point star.

- Diameter size 6mm
- Available in: 16 gauge thread / 14 gauge thread / universal pin
- Cast in solid 14k Gold
- Available in 14k White Gold, 14k Yellow Gold, 14k Rose Gold

SKU 5000-0003 3 COLORS 1 SIZE

Most of the constellations of the northern hemisphere derive from Greek astronomy, as are the names of many stars, asteroids, and planets. The Aster 05 is our five-point star.

- Diameter size 7mm
- Available in: 16 gauge thread / 14 gauge thread / universal pin
- Cast in solid 14k Gold
- Available in 14k White Gold, 14k Yellow Gold, 14k Rose Gold

SKU 5000-0002 3 COLORS 1 SIZE

It was as early as the 3rd century BC that the Greek astronomer Aristarchus of Samos proposed an alternate arrangement of the universe: a heliocentric model of the solar system, placing the Sun, not the Earth, at the center of the known universe. Our most intricate end, the Aster 08 has eight sides with a multitude of stars embedded in the design.

- Diameter size 8mm
- Available in: 16 gauge thread / 14 gauge thread / universal pin
- Cast in solid 14k Gold
- Available in 14k White Gold, 14k Yellow Gold, 14k Rose Gold
