CLEANING AND MAINTENANCE

Most household soil can be easily removed with warm soapy water and several clear water rinses. Moderate scrubbing with a medium bristle brush will help to loosen the soiling agent from the impressions of the surface. For more specific staining, refer to the following guide.

| STAIN | CLEANING INSTRUCTION |
|--|---|
| Soil, Eye shadow, Crayon, Chocolate, Suntan Lotion | Warm soapy water and rinse mild household cleanser such as 409® Rinse with clear water and dry. |
| Ball Point Ink | Immediately wipe with 70% rubbing alcohol. Rinse and dry with clean cloth. Rinse with clear water and dry. |
| Tar/Asphalt, shoe polish, grease | Remove immediately. Dampen cloth with mineral spirits, rub gently from outside edge of stain to center. Rinse with mild soap and water. Rinse with clear water and dry. |
| Surface Mildew | Use a mild household cleanser such as 409®. Rinse with clear water and dry. If mildew stain persists clean with 5:1 bleach and water. Rinse with clear water and dry. |
