

PRINT CAPABILITIES & CUSTOM DECORATION METHODS

Specialty Printing

At ACE USA, we are known for our specialty printing and embroidery techniques. Our talented artists and experienced operators ensure that your designs will always look their best. In addition to traditional spot-color inks, we offer various specialty inks and art distressing to make your logo or design stand out. We also offer various embroidery options such as puff embroidery and high color.

<p>PHOTO REFERENCE:</p> 	<p>CAVIAR PRINT</p>	<p>DISCHARGE PRINTING</p>	<p>DYE SUBLIMATION</p>	<p>FOIL</p>	<p>HIGH COLOR SCREEN PRINT</p>	<p>GLOW IN THE DARK SCREEN PRINT</p>
<p>WHAT IT IS?</p>	<p>Caviar Print is a technique where small beads are used to create the design on the fabric.</p>	<p>Discharge printing is the process of using water-based inks to bleach the original dye out of a shirt and replacing it with whatever dye color you choose.</p>	<p>Dye sublimation printing is a printing technique that involves applying a heat press to vaporize the ink and make the graphic. Available full, hood, and or pocket locations</p>	<p>Foil printing is a specialty printing process which uses heat, pressure and metallic paper (foil).</p>	<p>Screen printing is a technique that involves using a woven mesh screen to support an ink-blocking stencil to receive a desired image.</p>	<p>To create a glow-in-the-dark effect, a phosphorescent ink is printed atop a light reflecting white under base.</p>
<p>EXAMPLE:</p>	<p>A resort was giving out t-shirts with a view of the beach, and they wanted to highlight the sand with the beads.</p>	<p>The company wanted to have a flat design that would not fade off of the shirt.</p>	<p>A school wanted to put a picture of the mascot on the hood & the logo for the school on the front of the sweatshirt</p>	<p>A jewelry vendor was giving out t-shirts and used this technique to emphasize the diamonds on the shirt.</p>	<p>A company had a design with many colors, screen printing can do multiple shades and inks.</p>	<p>A museum was giving out t-shirts for their Space event and used this to make the planets glow in the dark.</p>

Specialty Printing and Embroidery

At ACE USA, we are known for our specialty printing and embroidery techniques. Our talented artists and experienced operators ensure that your designs will always look their best. In addition to traditional spot-color inks, we offer various specialty inks and art distressing to make your logo or design stand out. We also offer various embroidery options such as puff embroidery and high color.

PHOTO REFERENCE:

WHAT IT IS?

A photorealistic screen print is a technique that involves using multiple screens to create an image on a shirt.

Suede/Flock Screen Printing is where we apply color, adhesive and deposit many small fiber particles (called flock) or suede onto a t-shirt or apparel surface.

Gel Screen Printing adds a layer of "high density" gel on top of your screen-printed t-shirt or garment creating an amazing, decorative 3-D coating.

Embroidery is the craft of decorating fabric or other materials using a needle to apply thread or yarn.

High Color Embroidery is decorating your fabric or item with high color and high intensity thread.

This is the embroidery where a piece of the art or lettering puffs out above the rest. This is done by using 3-D Embroidery foam.

EXAMPLE:

A hospitality company wanted to put an image of their hotel on shirts to give out.

A furniture company used this technique to emphasize the design of their new couch.

A retail brand used this technique to accentuate their logo and make it 3-D.

A country club wanted a higher end decoration on the polo shirts they give out, so they used embroidery to print the logos onto the shirts.

A retail brand used high color embroidery to accentuate their new logo when they resigned it.

A Broadway Play used puff embroidery to emphasize the title of the play.
