

Green or Greenwash

Are you being told the truth about your "safe" nail polish?

Awareness of the products used on our bodies has become a top priority. As a result, many nail polish companies have removed Toluene, DBP (Dibutyl Phthalate) and Formaldehyde from their formulations to be free of the most harmful toxins, then claiming safety. Unfortunately, these nail polishes still contain a bevy of unsafe chemicals that are toxic to you and the environment.

Acquarella is **water based, toxin free** and **truly safe**.

Feature Comparison		O·P·I	SPARITUAL	ZOYA		essie
Water Based Solvent						
No Noxious Fumes or Odors						
Fully Plant Based Remover						
Vegan ¹						
No Base Coat or Top Coat Needed
