

LIVING NATURE[®]
Uniquely New Zealand

**CERTIFIED NATURAL
SKINCARE & COSMETICS**

WELCOME TO LIVING NATURE

When it comes to beauty solutions and skin wellbeing, nature works.

Established in 1987, Living Nature has been perfecting their skincare and cosmetics for over three decades and is proudly New Zealand's original certified natural skincare company. Since our inception, Living Nature has remained true to the vision of promoting authentic, natural beauty and doing no harm to our world.

Living Nature source their sustainably harvested and remarkable 'hero' ingredients from New Zealand's unique native plants, then crafts them with care and science to formulate over 100 active skincare, body care and cosmetic products. These potent natural blends are packaged with ethically sourced recyclable materials. Inspired by New Zealand's unique native flora, our fragrances are developed by a master French perfumier especially for our natural range.

The subtropical town of Kerikeri, in New Zealand's beautiful Bay of Islands region, has been our home for over 30 years. Steeped in history, blessed with warm weather and surrounded by the abundance of nature in local native bush, forests and beaches, this inspiring location is the

base for the Living Nature production and administration teams, along with our flagship retail store. Kerikeri is blessed with a truly 'artisan' vibe—a number of highly successful artists and sculptors hail from the region, which is also home to many vineyards and orchards producing kiwifruit, persimmons and citrus fruit. Bees are prolific during the pollination periods, and Living Nature's Mānuka Honey is sourced almost at our back door from a local supplier. The artisan approach is embodied in our Living Nature production philosophy, where production runs are managed by a highly experienced and skilled team.

Today, Living Nature has a strong base of New Zealand stockists and exports to over 13 countries. The passion for our products is imbued into every stage of the process to ensure absolute quality and care, from formulation and production through to the sale of every finished product. Our flagship store in Kerikeri exemplifies this approach with an exceptional level of product knowledge, where locals and tourists alike are greeted as welcome guests. Come and see for yourself on your next visit to Northland, New Zealand.

OUR CIRCLE OF TRUST

When you see our logo on a product, you can trust that it has been made with absolute integrity and honesty to nurture your skin, look after your health, and protect your planet.

Our products are independently verified for safety and we have our own in-house quality department. If there is any question about an ingredient's safety, we will not use it. Many synthetic products contain ingredients whose risks are widely known; others have risks as yet uncertain. Living Nature's proven effective natural ingredients work in harmony with skin's natural restoration and recovery mechanisms to actively enhance the wellbeing and beauty of your face and body. Put simply, nature works, so our products are free from:

- Preservatives like parabens
- Harsh surfactants like sodium, ammonium and lauryl/laureth sulphates
- Petrochemicals such as PEGs, paraffin and other glycols
- Silicones or mineral oils
- Artificial fragrances or colours
- Genetically modified or irradiated ingredients

Our certifying body BDIH adheres to globally recognised standards, which includes COSMOS, who set some of the most

rigorous global standards for naturalness and their inspection team audits us annually. In many cases we don't just meet, but exceed, their standards. These extend beyond ingredients to the environmental impact of sourcing raw materials and production and how ingredients are handled. Certification doesn't come easily, but it's worth it to demonstrate our commitment to safe, sustainable, natural products. Stringent protocols at our GMP certified Kerikeri factory ensure product integrity through every step of development, formulation, testing and filling. Our packaging is free from Bisphenol-A (BPA) and Phthalates. Our paper and cartons are sourced from renewable, managed forests, and our inks are free from dioxin and elemental chlorine.

Throughout all processes we maintain product safety to the highest possible standards while doing our utmost to protect our environment and minimise our footprint.

ORGANIC

WHY CHOOSE LIVING NATURE?

We were founded in 1987 in an age when 'natural' was not a buzzword.

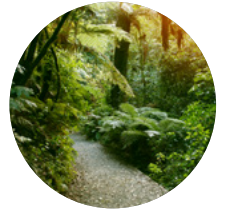

Made of and in New Zealand from ethical ingredients. All our skincare products and almost all cosmetics are made in New Zealand at our Kerikeri base and are accredited Buy NZ Made.

End-to-end supply chain. From research and development through to concept development, launch and post-launch, we oversee the whole product lifecycle. All skincare products are made at and dispatched from our purpose-built facility. From this base, we control every step of product development, formulation, testing, and filling.

Innovators in the natural space. We have developed many world leading products in the field of natural, stemming from our ability to use hero ingredients from New Zealand that are found nowhere else in the world. Innovations include: developing an effective gel to treat blemishes (Mānuka Honey Gel), the first ever in New Zealand to utilise certified organic cotton

sheet masks to deliver a Bee Venom Serum. We take pride in developing new products internally and independently.

There are products suitable for everyone. Living Nature has an extensive skincare range consisting of 'essentials' (e.g. cleanse/tone/moisturise) as well as specially developed products such as Firming Flax Serum and Radiance Night Oil. Our sensitive skin range is clinically tested and fragrance-free, so it can soothe, calm and nourish even the most sensitive and fragile skin. Living Nature is the sole natural New Zealand brand to stock a full cosmetics range, and has a line of professional products which is promoted to spa and beauty therapy customers across New Zealand and overseas.

OUR HERO INGREDIENTS

Active Mānuka Honey Mel

From the nectar of the native New Zealand Mānuka flowers, active Mānuka Honey is a miracle beauty ingredient.

A natural antimicrobial, it's one of nature's miracle healers, even approved for use in some hospitals globally for wound healing.

This uniquely New Zealand healer is used to firm and soothe, help repair cell damage and protect against blemish-causing bacteria.

And since it's safe to eat, you know you can put it on your skin.

Harakeke Flax Gel Phormium Tenax

Harakeke Flax Gel is nature's super skin hydrator, with a high quantity of natural skin nutrients.

Harakeke is renowned for the clear polysaccharide gel exudate produced on the surface of leaves at the base of the plant. The mild astringency of this gel helps control oil over-production which makes it an effective defence against breakouts.

Help your skin maintain its moisture, just as nature intended.

Halloysite Clay Kaolin

Halloysite Clay is renowned as one of the world's finest, whitest and purest clays.

Sourced from New Zealand's pristine Matauri Bay, Halloysite Clay was formed through subtropical weathering of ancient volcanic domes. This unique clay has a remarkable ability to absorb toxins and impurities from the surface of your skin, gently exfoliating the epidermis.

It's a gift of purity and refinement from the earth itself.

Totarol Podocarpus Tōtara

Sourced from organic Tōtara wood and bark, Totarol neutralises free radicals linked to skin ageing.

Totarol is present in Living Nature products to protect against oxidative stress and free radicals which break down skin cells, and is known for its powerful antimicrobial properties.

Nature's super antioxidant.

Mānuka Oil Leptospermum Scoparium

For centuries, Māori have used the native tea tree, Mānuka, to treat everything from rheumatism and fevers to burns and skin disorders.

When used in skincare, the antibacterial, anti-fungal and anti-inflammatory properties of Mānuka Oil combat skin irritation and protect against certain strains of bacteria.

Nature's potent skin protector.

Kūmerahou Pomaderris Kūmerahou

Native to New Zealand, Kūmerahou is quite simply the world's most natural soap.

The plant's high saponin content provides strong antimicrobial action and also soothes the skin and locks in moisture. Kūmerahou is used as an alternative to harsh surfactants such as sodium lauryl sulfate that strip the skin of its protective oils.

This historic cleansing plant is gentle and effective.

OUR TOP PRODUCTS

A selection carefully identified as the finest from the Living Nature range, blended with natural and organic ingredients from New Zealand.

Vitalising Cleanser
Gently removes impurities without depleting moisture

Extra Hydrating Toning Gel
Rehydrates and restores skin's natural pH balance

WHAT IS MY SKIN TYPE?

Does your skin have...	Oily/ Blemish Prone	Combination/ Normal	Dry	Sensitive
Large visible pores	●			
A fine texture (no visible pores)		●	●	●
Shiny T-zone	●	●		
An oily film at the end of the day	●			
A dull dry feeling at the end of the day		●	●	
A perfect 'rosy' complexion with no specific concerns		●		
Acne, pimples & blackheads	●			
A constant tight feeling			●	●
Red / inflamed patches			●	●
Dry scaly areas			●	●
Thread veins		●	●	●
Excessive wrinkles (for my age)			●	
Skin appears thin			●	●
Skin appears thick	●			
Sensitivity to perfume/ fragrance				●
Reactions to skincare/makeup				●

Living Nature offers a range of products suitable to balance, nourish, hydrate and soothe the following skin types.

Oily/Blemish Prone

Oily skin is caused by an overproduction of sebum, which can be brought on by a multitude of factors including genetics, hormonal changes, or comedogenic cosmetics. Oily skin often goes hand in hand with acne, further complicating this skin type.

Combination/Normal

Neither too oily nor too dry, with small to medium size pores, normal skin is well balanced. Free of many common skincare issues, a healthy daily skincare routine will help maintain this. Sometimes you may experience an oily T-zone and drier cheeks; resulting in a combination skin type.

Dry

Dry skin is caused by the skin producing less sebum than normal, which results in a lack of moisture. This delicate and fine skin type may feel flaky, tight, and dry. Dry skin can vary in severity, but skin typically gets dryer with age.

Sensitive

Sensitive skin is characterised by a fine texture (no visible pores). It may display signs of reactivity such as redness or a blotchy appearance coupled with a tight or dry sensation. Skin sensitivity can be caused by numerous factors, including genetic predisposition, diet, and hormonal fluctuations.
