Guidelines on usage:

- People with special medical problems should consult their doctors before using.

- Usage recommends time is based on individual comfort level and can be adjusted accordingly. The recommended time is 20-30 minutes per session.

- However, for user who needs more time to adjust to Relax Far Infrared Ray, please keep the session short (about 5-15 minutes) and after resting for 10 minutes, continue a second session for another 5-15 minutes at the first few weeks. This is not uncommon for people who do not have regular exercise and people who do not perspire easily.

- We do not encourage you to use perspiration amounts as a gauge of the sauna’s effects. If the body’s condition is improved, a proper amount of sweat will naturally occur.

- During the session should the user feel that his feet is too hot, it could be that the sauna cover is too close to the wall. Move the cover further away from the wall.

- After each FIR sauna session
Installation:

1. Spread the sauna's mat flat on the floor before placing the air/water pillow at its other end for the head (away from the radiator).
2. The cord should be straightened and the controller placed near the user (as shown in fig. 1).
3. For use, pull the cover right up to your neck (as shown in fig. 2) before switching on the device.

Guidelines on Maintenance:

- After a period of usage, vacuum the air filter locate at the rear of FIR Blower.

- Do not touch the FIR blower, as it will be hot during the sauna session.
• The occurrence of red spots and itchiness is normal in that it is only a transitional phase in the process of detoxification. When toxins are unable to be carried away by the body’s blood stream, they appear as red spots on the skin. Areas more affected than others are often an old injury. Different individuals experience different and normally in 2 weeks, the sort of reaction will clear. Keep the session short at begin if red spots occurs. If ever if your skin itches, avoid scratching.

• Not everyone will experience the dizziness but even if you do, sit on a chair and take a break. This is same reaction as intense exercise since body may not adjust to the change right away.

• For Long term users, take supplements/ mineral to boost up nutrition.
