

Stencils, Masks & Patterns Selection Guide

Vinyl Peel & Stick Mask is an 8 mil self-adhesive medium vinyl, used to form channels for application of Spraycrete, GraniTite & other decorative concrete coatings to form precise labyrinth patterns on concrete. No cutting or grooving of the concrete is needed. It may also be used to guide application of spray-on coatings for wood, vinyl and other surfaces. And it is used for medium and light-duty sandblasting of concrete and other surfaces.

Kraft Paper Full Size Print Patterns may be used as full coverage stencils. Once secured in place, cut using a razor knife or paper slicer. Adhere to smooth surfaces using contact cement. We will print tape guidelines upon request if you prefer to use masking tape to adhere the pattern. Patterns are used as spray coating channels or for roller application of paints.
