

How to Make 3-D Stars

1. Choose three stars and fold them in half lengthwise.
 (Any symmetrical shape will work!)

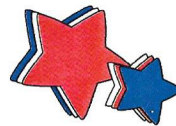

2. Place two folded stars together as shown. Match up sides and fold carefully. Glue the 3rd star on top. Staple 3-D stars in a row for a unique decorative bulletin board border.

3. To make 3-D hanging decorations, cut a 10" piece of yarn & knot the top. Place yarn in the center fold on the backside. Glue the back sides together and match up sides and folds carefully.

Variations:

Fold and glue five stars together for a more layered effect. Great for pop-out 3-D star border on bulletin boards. Leave back sides open and staple to bulletin board. Add silver or gold glitter glue. Have fun!
