## COMFORT IS ON OUR MIND

At Molmic, we believe it is what's inside our products that makes us stand out from other furniture manufacturers. Our development team perform expert checks to create the look and feel of each of our products. Whether it is for lounging or sitting, comfort is on our mind.

**SUPER LOOP SPRINGS**  
For back lumbar support

**FIBRE OVERLAY**  
Protects foam from fabric abrasion

**FOAM OVERLAY**  
Extra padding

**ARM FILLER**  
Extra arm support

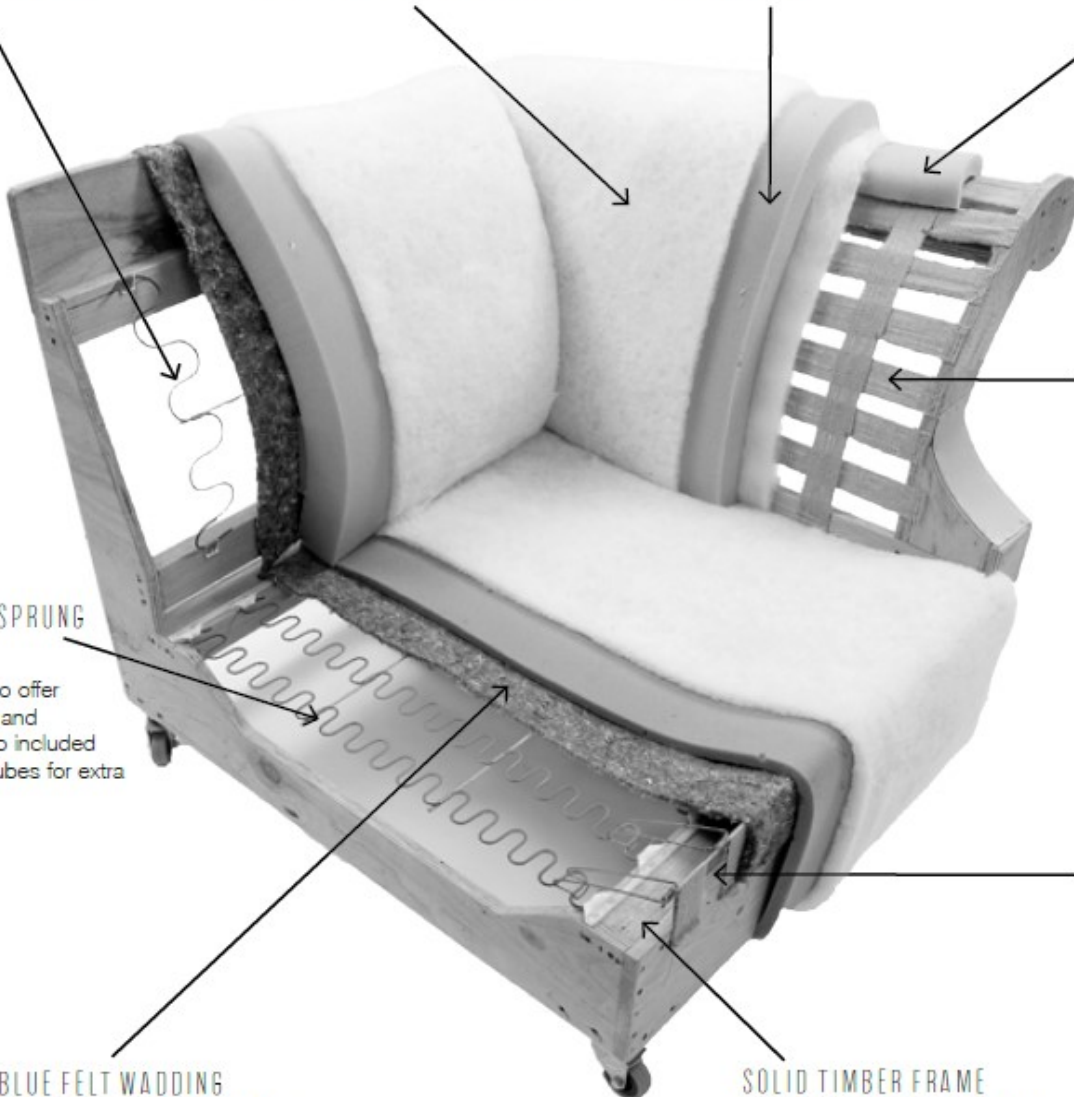

**NO SAG STEEL SPRUNG SUSPENSION**  
Enables Molmic to offer luxurious seating and durability. We also included two cross steel tubes for extra reinforcement.

**JUTE WEBBING**  
Assists form and maintains the shape of the sofa. (Super loop springs are also used depending on the shape of the arm).

**BLUE FELT WADDING**  
An insulator between the foam, which prolongs the life of the foam and reduces the noise from springs.

**FULL SPRUNG EDGE**  
To enhance the comfort and support on select designs.

**SOLID TIMBER FRAME**  
Using forest renewable timbers and hardwood in stress areas to increase the strength of the frame. This enables us to give our frames a 10 year warranty.

## IT'S WHAT'S INSIDE THAT COUNTS

Each of our seat cushions is tailored to a different level of comfort. We take this into consideration when we design our sofas, chairs, modulars and even our ottomans.

### **MOLMIC FEATHER BLEND - 5 YEAR WARRANTY**

Features luxurious duck feather and siliconised fibre encased in a japara pocketed sewn cover to provide sumptuous relaxed domed comfort. Molmic Feather Blend comes with 5 Year warranty. Whilst the fibre is included to provide buoyancy routine maintenance is required with regular rotation and plumping.

1. Completely lift your seat cushion off your sofa and place on its side on the ground.
2. Pummel or beat the cushion to put air back into the cushion and to move back the feathers that may have gathered or clumped together. Repeat on all four sides.
3. Now that the air has been distributed throughout the cushion pat down in the top and bottom to leave a perfect seat.
4. It is also a good idea to occasionally rotate your Molmic Feather Blend seat and back cushions.

For further instructions view Molmic's how to plump video at [www.molmic.com.au/care](http://www.molmic.com.au/care)
