'Nufurn customers keep coming back for the Service, Range, Experience, Quality & Value' Join us!

### An Introduction to Nufurn

Welcome to Nufurn. Established since 1996, we design, manufacture and supply a specialist range of contract furniture to the Conference/Event and Hospitality Segments. We invite you to experience the Nufurn difference today and join our ever growing list of satisfied customers that range from International Hotel Groups and Conference and Function Centres, to Clubs and Restaurants, to local Community Halls, Churches and School Auditoriums, as well as Architects, Designers and Government Institutions.

As true market leaders and innovators within our field, we offer a comprehensive range of robustly designed and custom manufactured, contemporary commercial furniture to perfectly suit your hospitality venue and event business requirements.

With our heritage in designing, manufacturing and supplying furniture to the global event and hospitality market, we truly understand the importance of strength, function and style. Durability is the cornerstone of our design process and is exemplified in the finished quality of our products. Exceptional customer service is our signature.

Please visit our website www.nufurn.com.au and see for yourself the reason that people keep coming back to Nufurn.

#### Welcome to Nufurn.

We look forward to being of service to you.

# QUALITY CONTROL - THE NUFURN DIFFERENCE

All of our banquet chairs are manufactured to the AFRDI Blue Tick AS/NZS 4688:2000: Level 6 - Severe Commercial Use standard. The only way to truly control the quality of the output is to completely control the quality of the input. This is what we have built our name on. We control the specification of every raw material, how they are processed and treated and we also control every single stage of the manufacturing process. Thereby we maintain an incredible benchmark of exceptional quality, world class standard and industry leading durability.

#### STEEL TUBING

Our steel tubing is cold rolled for superior hardness and structural integrity, Mandrel bending ensures a frame that is designed to withstand and outlast the most severe commercial usage.

#### ALUMINIUM TUBING

Manufactured to our unique specification our high grade aluminium tubing with mandrel bending is designed for applications where weight savings are important and tube design forms an important part of the chair's overall design features.

#### PRODUCT TESTING: ERGOFLEX L PLATE

Tested to 120,000 cycles, our Ergoflex L plate is securely fixed between the seat base and fully welded seat frame for extreme durability. Our unique, fully welded frames are specifically positioned to run over the L plate, thereby ensuring that once it's in place it will remain in place.

#### **FULLY WELDED FRAMES**

High strength, heavy duty seam welding on all frames. Our proprietary seam welding process results in a rock solid, single structure, rigid frame with a structural integrity that is unsurpassed. The structure of our fully welded banquet chair frames are 100% maintenance free and guaranteed for 12 years commercial use.

#### PROTECTIVE STACKING PADS

Sometimes it's the simple things that count. Our stacking pads are a simple and effective way to protect frames while stacking.

#### REINFORCING BARS

The Nufum reinforcement bar is welded as a structural support between the two rear legs. This creates a remarkable increase in lateral rigidity and significantly increases chair durability.

#### SELF LEVELLING CHAIR GLIDES

Our self levelling metal glides use an external boot and exclusive internal double lock system to ensure a secure fit within the chair leg. The boots help protect chair frames and fabric when stacking while the self levelling glides ensure perfect chair to floor contact, protection and ease of movement.

#### RESIN CHAIR GLIDES

Made of high density resin, our chair glides allow for easy movement of chairs while seated and provide protection for all floor surfaces.

# technical specifications

#### SUPERIOR STITCHING

A fabric is only as good as the seam used to bind it. We use the right stitch method on each seam, specific to the fabric chosen that ensures peace of mind and proper fabric performance.

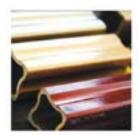

#### REINFORCED PLYWOOD SEAT BOARDS

1/2inch plywood seats are used for their structural integrity and natural feel that remain sound for the life of the chair. All of our plywood seats are reinforced underneath with an additional internal seat bar that is welded in place to ensure maintenance free longevity.

#### HIGH PERFORMANCE FABRICS

We offer a comprehensive selection of classic fabrics that have been selected for their commercial durability. If you're after a different fabric look, Nufum can help you choose a fabric from any of the country's top textile suppliers, or you can simply supply your own fabric

## COMMERCIAL POWDERCOATS

We use a 6 stage proprietary powdercoat process that includes a 3 stage prevash to properly prepare the metal tubing for powder coating and a unique 3 stage application process including base preparation which allows super strong powdercoat adhesion that is cured at a temperature above 200°C.

#### HIGH DENSITY FOAM

Our exclusive 2lb and 3lb commercial grade, fire retardant LuxPlus foam is offered across our entire range of banquet seating. Manufactured to strict specification in order to provide the ultimate in superior comfort, day in day out, for years to come.

#### PROFESSIONAL SHIPPING

The final step in supply is shipping and delivery. All chairs are expertly packed for maximum protection during shipping. Each chair is individually wrapped then stacked and boxed to ensure the products arrive at your venue brand new and ready to impress.

#### OH&S/WHS

Looking after staff is critical and the provision of the right equipment is a necessity for every venue. We have a full range of chair and table hand trolleys to make setup and storage time efficient and safe.

"Durability is the cornerstone of our design process. Exceptional customer service is our signature."

#### IMPECCABLE CUSTOMER SERVICE

Our customers are our biggest asset. We pride ourselves on taking the time to understand your needs and provide the best commercial furniture solution for your requirements, on time and with integrity.

# design features

## ANDHOLDS

With correct use, optional handholds make chair handling safe & comfortable.

## 2 PREMIUM GRADE COMMERCIAL FABRIC

Range of commercial grade fabrics to choose from that offer excellent wear properties.

## FRAME

All frames are fully welded for ultimate strength. Commercial grade powder coating is standard with a choice of aluminium or steel tubing available in a range of styles and colours.

## 4 LUXPLUS FOAM

65mm/2.5" thick fire retardant commercial grade foam for ultimate comfort & durability. Foam profiles are dependent on chair model.

## 6 LEG SUPPORT BAR

Nufurn reinforcement bar is welded as a structural support bar between the two rear legs. This creates lateral rigidity and significantly increases chair durability.

## 6 STACKING BARS

Welded stacking bars allow vertical stacking while reducing wear and tear on upholstery, allowing seats to 'breathe' while providing enhanced structural strength.

# STACKING PADS

Unique stacking pads to protect the frame and upholstery.

# 8 SELF LEVELLING CHAIR GLIDES

Optional self levelling chair glides allow for easy movement while seated and provide protection to all floor surfaces. Nylon glides are provided as standard.

# Simply a better table. Built to outlast.

- High friction, non-slip stacking bumpers for safety
- Injection moulded, reinforced ABS corners
- 17mm high impact resistant
   'Pro-Edge' PVC bumper
- 100% Recyclable honeycomb fibreboard core
- Frame to frame, 2mm thick, solid steel fixing plates
- Industrial grade polypropylene feet to protect floors
- Nufurn stamp of authenticity to ensure you have the genuine EventPro-Lite<sup>™</sup> tables
- Full perimeter, 'Box construction' 16 gauge, internal, annealed steel frame
- All brackets and legs attached to steel plate reinforced contact points
- Industrial grade blind rivets used on leg mechanism for security
- Gravity locking leg mechanism
- Superior quality, industrial grade fixtures and fittings
  - Extra deep handrail

NF690005 approved to BS EN 15372:2008 Level 3, Severe Commercial

### SUPERIOR, NEXT GENERATION, LIGHTWEIGHT TABLES

High friction rubber bumpers help prevent tables from sliding when stacked and help protect table tops.

Full perimeter, "Box construction" 16 gauge, internal, annealed steel frame is at the structural core of the table and can hold a static load of 945kgs of evenly distributed weight.\*

Injection moulded, reinforced ABS corners engineered to withstand an accidental drop from 30cm with no structural damage to the table.

All brackets and legs attached to 2mm thick, solid steel fixing plates.

17mm thick, high impact resistance 'Pro-Edge' PVC bumper protects the table edge and is also designed for use with tablecloth clips.

Industrial grade blind rivets used on leg mechanism for security and zero maintenance.

100% Recyclable honeycomb fibreboard core for high impact resistance, superior core strength and lightweight benefits.

1.2mm thick, fully welded steel, gravity leg locking system that automatically and safely locks the legs when extended and placed on ground. Foolproof for added safety.

Frame to frame, 2mm thick, solid steel fixing plate, reinforces contact points for strength and enhanced lateral rigidity.

High quality, industrial grade fixtures and fittings to secure the leg system to the steel reinforced table

Industrial grade polypropylene feet to protect all floor surface types and maintain table stability.

Extra deep handrail allows safe and easy manual handling and conceals legs when folded to protect tabletops.

Nufurn stamp of authenticity to ensure you have the genuine and original EventPro-Lite™ tables.

All EventPro-Lite™ tables come with the exclusive Nufurn 12 year warranty.

\*Standard 6ft/1830mm Trestle

Modular nesting table systems offering outstanding versatility and practicality with countless configurations.

Wide range of materials and finishes. Dimensions to your specifications

A complete range of dry bars and cocktail tables to suit any function.

## FINISHING OPTIONS

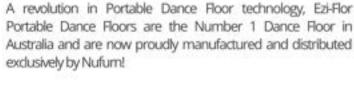

(Alternate finishes available on request)

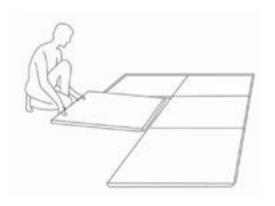

Forget expensive magnets, dunky carn locks & fiddly grub screws, Ezi-Flor Portable Dance Floors require no tools and have no moving parts. This means they are super easy to setup and pack up and require very minimal maintenance or replacement parts throughout the many years that they'll be serving your venue.

Ezi-Flor Portable Dance Floor Panels are secured via a unique, aluminium track, friction locking method that, whilst easy to lay and lift remains incredibly stable and secure when in use. A hard wearing Oak Parquetry timber surface is laid upon a moisture resistant MDF panel base and finished with

Aluminium tracks friction lock together for further safety and durability.

The entire Nufum Ezi-Flor Portable Dance Floor can be laid and secured within just a few minutes by one person.
