

POWDER-COATED ALUMINIUM BALUSTRADE SYSTEM HANDRAILS

Metal Balustrade Handrail made from durable powder-coated aluminium and available in a range of sizes to suit your decking project. The superior aluminium Balustrade System can be used with Cladco Solid Composite Decking, PVC Decking or Timber Decking installations.

This Balustrade Handrail is available as a 1050mm high section and available in widths of 800mm, 1000mm, 1200mm, 2000mm, 2200mm and 2400mm. Matching Balustrade Gates and Posts are available to purchase. Metal Balustrades are sturdy, attractive and durable alternatives to Balustrade options available on the market, offering superior strength and longevity for peace of mind when used on a decking project. The powder-coated aluminium Balustrade System is made from extruded and welded aluminium sections which are strong, low maintenance and non-corrosive.

Balustrades can easily be re-painted to match your decking installation or colour of choice. Handrails are manufactured and sold as complete sections, no self-assembly is required and they are easy to fit between Posts. To create a Balustrade System simply add consecutive sections to achieve your desired length of Balustrade. We offer different widths of Handrail sections, available from 800mm to 2200mm (plus 200mm along the Handrail section).

Balustrades can be used with Handrail sections and Posts for use alongside decking installations, walkways, balconies and more.

Each Balustrade System can be used with side fitting brackets and foot caps included.

Features
