

Product name	Product group	Production location
Flemish Antique	L1	Lanklaar

The raw materials are excavated in Weichsel loam layers, the local loam of Aeolian origin dating from the Ice Age. This löss mainly consists of a silt-like fraction, suited ideally for the manufacturing of hand form bricks. By using specific sand types for surface covering, the desired colour is achieved.

Colour			
red brown with light and dark shades			
	Forn	nat	
Moulding met	hod	Hand form	
DF: 214 x 101 x 65 mm	-		average size and color may slightly differ.
Essential Cha	Essential Characteristics - EN771-1		
C E 0620-CPR-97884			0620-CPR-97884
Dimensional tolerances		T2	
Range		R1	
Active Soluble Salts		S2	
Mean Compressive strength	>	>= 20 N/mm²	Tested to the bed face
Normalized Compressive strength	>	>= 20 N/mm²	Tested to the bed face
Dimensional stability		NPD	
Bond Strength general	(0,15 N/mm²	
Bond Strength thin layer		0,30 N/mm²	
Reaction to fire		A1	Category
Water absorption	<	= 14% m/md	
Water vapour permeability		5/10	
Net dry density	17	′40 kg/m³ (D1)	
Gross dry density	16	30 kg/m³ (D1)	
Thermal conductivity Lambda 50/50	<	=0,60 W/m.K	
Durability against freeze thaw		F2	
Dangerous substances		NL-BSB	According to Annex ZA 3

Other Characteristics			
Initial rate of water absorption - Non-coated Bricks	1,5 - 4.0 kg/m².min (IW3)	Value according EN771-1:2011 - 5.3.8	
Initial rate of water absorption - Coated bricks	0,5 - 1,5 kg/m².min (IW2)	Value according EN771-1:2011 - 5.3.8	
Freeze/thaw resistance	NPD	В 27-009	
Thermal conductivity Lambda 90/90	0,65 W/m.K		
Thermal conductivity Lambda Ui	0,697 W/m.K		
Thermal conductivity Lambda Ue	1,376 W/m.K		

Storage & handling	Cutting
- Store packs on a clean surface and cover them - Process from multiple packs at the same time - Follow the Vandersanden processing guidelines	Cutting with power tools may generate dust. This dust may contain silica or quartz particulate which may constitute a hazard. Persons undertaking work of this nature are advised to wear dust masks (FFP3).

*All our Coated bricks are only coated on the facing sides. Coated products are specially labeled and recognisable with a "C" logo on the top left-hand side of the packaging. Always check if using coated or non-coated bricks. Match the mortar to the specified initial water absorption.
