REVISED 25 04 2023

Super Smooth finishing plaster.

A high-quality fine finishing plaster for internal use, to achieve an attractive smooth or fine polished surface finish.

Versatile plaster finish for a range of backgrounds.

Apply as a thin coat skim finish direct to plasterboard, as a super smooth finish to Adaptavate products or for overskimming existing plaster.

Fast, easy application

Fast setting and easy to use. A fast setting time of just 60-90 mins per coat allows for fast and efficient completions in as little as 3 hrs start to finish.

A simple finish to reduce mould and condensation

An easy-to-use alternative to gypsum that breathes life back into any building.
