Data Sheet

Sealing Plug

The Sealing Plug is a revolutionary solution for sealing structural concrete formwork spacers. Sealing Plugs comprise of a water-swellable rubber cap and solid core. The cap prevents water infiltrating the spacer and the core provides a mechanical anchor under water pressures up to 6 bar.

This water-activated, self-expanding sealing solution is one of our most innovative. It guarantees a perfect seal, combating moisture infiltration with a single hammer blow!

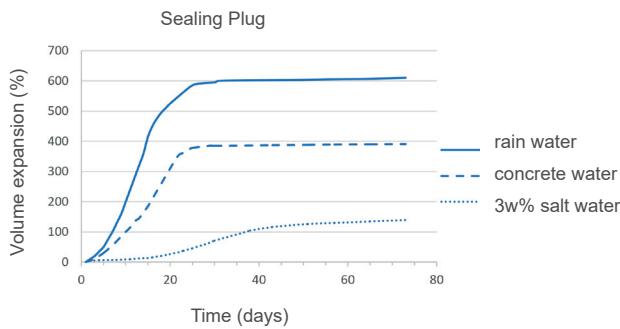

Patented water-swellable plug for a perfect seal of formwork spacers.

Product Code	Colour	Size (mm)	Pack Size	Pallet Size
SP22*	Blue	22	100	18,000
SP24	Blue	24	100	9,000
SP26*	Blue	26	100	9,000
SP32*	Blue	32	100	9,000
SP34	Blue	34	100	9,000

* Stocked in the UK.
