

Novia® Breather Membrane Lap Tape is a sealing and bonding tape suitable for overlaps and joints on **Novia® Breather Membranes** within both roof and wall applications. It has a high strength acrylic dispersion adhesive and non-woven polypropylene as the carrier.

Novia® Breather Membrane Lap Tape is suitable for use with **Novia® Breather Membranes** and should be used to seal all membrane overlaps to protect against external environmental conditions and improve airtightness. To fully complete a breather membrane seal and further reduce the air-leakage of the construction, use this tape in conjunction with **Novia® Double Sided Adhesive Tape**.

This tape is required for use with some breather membranes in accordance with BS 5534 wind uplift requirements. Please see individual **Novia® Breather Membrane** technical datasheets for guidance and geographical data.

Example installation (plan view)

Nominal Technical Data *

	Value	Units	Test Method
Roll Width	50 / 75	mm	
Roll Length	25	m	
Roll Weight	0.55 / 0.8	kg	
Elongation	≥ 50 (40%)	N/25mm	DIN EN 14410
Thickness	0.55 - 0.6	mm	DIN EN 1942
Peel Adhesion	≥30	N/25mm	DIN EN 1939**
Processing Temperature	From -10	°C	
Temperature Resistance	-30 to + 100	°C	
Shelf Life	12 months when stored in original packaging at 21°C and 50% relative humidity
